January	C1-C186	E1-E151	G1-G144	H1-H154	R1-R129	F1-F159
February		E153-E267	G145-G260	H155-H296	R131-R269	F161-F318
March	C187-C387	E269-E390	G261-G384	H297-H424	R271-R390	F319-F458
April		E391-E490	G385-G493	H425-H591	R391-R504	F459-F620
May	C389-C565	E491-E632	G495-G594	H593-H749	R505-R644	F621-F738
June		E633-E752	G595-G762	H751-H976	R645-R762	F739-F904

Subject Index to Volume 248

A

- Acarbose, sham feeding and, gastric, R387
- Acetate, cerebral blood flow, during hyperammonemia, H500
- Acetazolamide
bicarbonate absorption and, cortical thick ascending limb, F821
biliary bicarbonate secretion, ursodeoxycholate-induced, G20
calcium flux and, calvariae, F785
hydrogen transport and, papillary collecting duct, kidney, C241
- Acetylcholine
arteriole response to, renal, F183
efferent vagal innervation, heart ventricles, H89
muscarinic inhibition, small intestinal motility, G526
release, presynaptic modulation, cardiac parasympathetic neurons, H33
- Acetylspiramycin, interdigestive migrating contractions and, gastrointestinal tract, G320
- Acetylstrophanthidin, intracoronary, reflex cardiovascular effects, awake state, H930
- Acid
excretion
net, acid-base balance, alkalosis, F796
renal ammoniogenesis and, F607
formation, permeable gastric glands, prestimulation and, G561
microclimate, intestinal villi, jejunum, G293
secretion
cholinergic stimulation, calcium metabolism during, G216
electroneutral, gastric mucosa (frog), G246
fundic mucosal cells, G569
sham feeding, bethanechol, and bombesin effects, G1
secretory response, tricyclic antidepressants and, gastric cells, G360
- Acid-base balance
ammonia effects, transport, cortical collecting tubule, F631
ammoniogenesis and, renal, F607
biliary bicarbonate secretion, ursodeoxycholate-induced, G20
citrate excretion in, diuretic-induced alkalosis, F796
 α -ketoglutarate reabsorption, nephron, F404
parathyroid hormone, calcium ion, vitamin D, inorganic phosphate effects, F739
- Acidification
cell type and, bladder (turtle), R584
proximal tubular
amiloride inhibition of, F773
models, F272
renal
in response to chronic respiratory acidosis, F492
parathyroid hormone, calcium ion, vitamin D, and inorganic phosphate effects, F739
urinary
ammonia transport, kidney, F459
outer medullary collecting duct, F500
sodium-dependent bicarbonate absorption and, cortical thick ascending limb, F821
- Acidosis
adenosine deaminase activity, contracting fast-twitch muscle, C43
biliary bicarbonate secretion and, ursodeoxycholate-induced, G20
calcium flux and, calvariae, F785
lactic, hypoglycemia and, endotoxic shock (sheep), E309
metabolic
cortical collecting tubule, F631
parathyroid hormone, calcium ion, vitamin D, and inorganic phosphate effects, F739
renal acidification in response to, F492
muscle metabolism and performance, heavy exercise, C337
regulation of ammoniogenesis, renal, F607
respiratory, renal acidification in response to, F492
sudden potential drop, gastric mucosa (bullfrog), G587
type II renal tubular, phosphate loading effects, F513
- Acinar cell: see Pancreatic acinar cells
- Acridine orange
cell type differentiation, cortical collecting duct, F449
kidney cortex, ATP-dependent hydrogen pump in, F835
permeability, proximal tubule brush-border vesicles, F78
- Actinomycin D, hexose transport inhibition, adipocytes, E215
- Acyl-CoA esters, fatty, interaction with brown fat mitochondria (hamster), E699
- Acylglyceride, metabolism, adipose tissue, E140
- Adenine nucleotides
acidosis effects, contracting fast-twitch muscle, C43
aerobic metabolism, fast-twitch muscle, C37
myocardial ischemia and, H644
serotonin, endothelium-dependent relaxations and, platelets, H389
- Adenosine
angiotensin II interactions and, glomerular filtration, F340
arterial flow and, hepatic, H331
coronary vasodilator reserve, functionally significant flow reduction effects, H403
hyperosmolality, glucose-induced intestinal hyperemia and, G521
infusion, maintenance of renal autoregulation, F366
inhibition, cardiac membrane adenylate cyclase, H737
intracoronary, myocardial reactive hyperemia and, H812
metabolism, skin fibroblasts, C21
myocardial ischemia and, H644
plasma and urinary, renal handling of, F545
smooth muscle relaxation, cellular calcium and (ferret), H109
transport, calcium channel antagonists and ions in, erythrocytes, H593
ventricular automaticity and, H907
- Adenosine analogues, ventricular automaticity and, H907
- Adenosine deaminase
activity, acidosis effects, contracting muscle, C43
metabolism, skin fibroblasts, C21
- Adenosine diphosphate
nuclear magnetic resonance, fast- and slow-twitch muscle, C279
relaxation, platelets, H389
- Adenosine monophosphate, cyclic
acid secretory response, gastric cells, G360
adenosine triphosphate, tubular metabolism, F152
adrenal steroid secretion, calcium in, E89
apical chloride conductance, proximal tubules (shark), F282
8-(p-chlorophenylthio)-, water and sodium transport and, urinary bladder (toad), F594
concentrations, Langerhans islets, C145 dibutyl
basolateral sodium conductance and, Malpighian tubules, R339
inhibition of sodium-hydrogen exchange, renal brush-border vesicles, F212
hexose uptake and, adipocytes, E706
injection, calcium slow channels and, heart cells, H745
interactions of vasopressin and prostaglandins, urinary bladder (toad), F454
metabolism and lipolysis, cafeteria diet and (hamster), E224
muscarinic stimulation, pepsinogen secretion (frog), G79
phosphate excretion and, renal, F64
postexercise ketosis, fasted endurance training, R63
potassium and chloride secretion and, colonic, G103
sodium and chloride transport and, ileal, G726
stimulation of glycogen phosphorylase, hepatocytes, newborn, E560
transmembrane potential, papillary epithelial cells, F762
volume expansion-induced proximal inhibitory effect, parathyroid hormone and, F100
- Adenosine triphosphatase
chloride-bicarbonate-stimulated, intestinal mucosa, R241
high-affinity calcium, antrum smooth muscle plasma membrane, C449
myofibrillar, diabetes, E170
- Adenosine triphosphate
acidosis effects
contracting fast-twitch muscle, C43
muscle metabolism during heavy exercise, C337
adenosine monophosphate, cyclic, tubular metabolism, F152
aerobic metabolism and, fast-twitch muscle, C37
heavy exercise and, muscle, C109
neural mediator, gastric relaxation (guinea pig), G73
pH change, pancreatic function and, C235

- Adenosine triphosphate (*continued*)
 phosphorus nuclear magnetic resonance, leg muscle, C542
 relaxation, platelets, H389
- Adenosine triphosphate-magnesium chloride, hepatic microcirculatory failure, ischemia and reperfusion, H804
- Adenylate cyclase
 liver, developmental changes, E712
 myocardial, adenosine effects, H737
 renal tubular epithelial response, F436
 tubular metabolism, parathyroid hormone and, F152
 vasopressin-induced sodium changes, kidney, F767
- Adipocytes
 brown, cAMP in, cafeteria diet and (hamster), E224
 calcium homeostasis, alteration by *Escherichia coli* endotoxin, R331
 hexose transport
 inhibition by dexamethasone, E215
 regulation by isoproterenol, E706
- Adipose tissue
 brown: see Brown fat
 fatty acid reesterification, radioisotopic technique, E140
 insulin sensitivity, dose-response relations, E353
 perirenal, ephedrine-induced thermogenesis, E507
 white
 hypothalamic obesity and, E607
 lipectomy, fat deposition and, R231
- Adipsia, lesions and, nucleus medianus, R214
- Adrenal cortex
 growth, sympathectomy effects, E261
 regeneration, adrenocorticotrophic hormone and γ -melanocyte-stimulating hormone in, E471
- Adrenalectomy
 bilateral, glucocorticoid effects, sodium-potassium-ATPase, F487
 bone mineral loss, during lactation, E182
 functional control of heart rate, neonate, R601
 postpneumonectomy lung growth and, E70
 potassium recycling, aldosterone effects, F219
 sodium chloride intake and, R1
 steroid effects, adrenal growth, E450
 unilateral, sympathectomy and adrenal cortical growth, E261
- Adrenal gland
 aldosterone secretion, calcium antagonist effects, sodium depletion (sheep), E676
 compensatory growth, mineralocorticoid and glucocorticoid effects, E450
 corticoids, circadian timing and (hamster), R434
 hypothalamic obesity, brown fat and sympathoadrenal activity, E607
 regeneration, γ -melanocyte-stimulating hormone and adrenocorticotrophic hormone, E471
- Adrenal glomerulosa cells, aldosterone production, calcium efflux effects, E36
- Adrenal medulla, plasma epinephrine, fasting and exercise, R302
- Adrenal steroids, chloride conservation, renal, potassium depletion and, F104
- Adrenergic activity, cardiac, diabetes and, neonate (lamb), H125
- β -Adrenergic agents, hexose uptake and, adipocytes, E706
- Adrenergic function, hypertrophied heart, H485
- β -Adrenergic modulation, cardiac defibrillation, anesthesia, H674
- Adrenergic nerve, endings, norepinephrine uptake, H193
- Adrenergic nervous system, hypertrophied heart, norepinephrine effects, H485
- α -Adrenergic phenomena, mechanisms involved in, E633
- Adrenocorticotrophic hormone, immunoreactive, during adrenal regeneration, E471
- Adrenocorticotropin, pituitary, urophysectomy and (goldfish), R197
- Adrenoreceptors: see Receptors
- Aerobic capacity: see also Exercise
 maximal, obesity and insulin action relations, E286
- Aerobic metabolism, IMP accumulation and, fast-twitch muscle, C37
- Afferent nerves, substance P release, muscularis mucosa (opossum), G655
- Afferents
 baroreceptor, amygdala, R38
 cutaneous, stimulation, short-latency tachycardia, R426
 innervation, cell geometry and, R288
 kidney, mechanoreceptors (monkey), R202
 somatic, short-latency tachycardia and, R426
 vesical, urinary bladder distension, sympathetic response to, R236
- Aging
 kidney function and, R282
 metabolic rate and, food restriction effects, E488
- α_1 -Agonists, intracellular second messengers, liver, C203
- Air, expired, temperature, central control of (reindeer), R679
- Air sacs, carbon dioxide in (penguin), R748
- Airway, epithelium, bradykinin effects, F48
- Alanine
 ^{14}C -labeled, gluconeogenesis with, R391
 malnourishment and, during parenteral nutrition, E409
 metabolism, hepatic, awake state, E463
 transport, diabetes effects, liver plasma membrane vesicles, E581
- L-Alanine, phosphate transport, LLC-PK₁ cells, F122
- Albumin
 biliary excretion of, tauroursodeoxycholate prevention of, G407
 fatty acid-free, membrane damage and, renal cortical mitochondria, F876
 flame values and, cerebrospinal fluid and plasma, R621
 ^{125}I -labeled, arterial transmural transport, mathematical models, H240
 modulation, capillary permeability, H264
 organic anion removal, Disse fluid effects, liver, G709
 rose bengal transport and, hepatic, G702
 synthesis, diabetes and insulin effects, E656
 thyroxine bound to, liver, G545
- Albumin-ligand complexes, cell surface-mediated dissociation of, hepatic, G702
- Alcohol dehydrogenase, increased consumption and blood level, portacaval shunt and, G287
- Aldosterone
 actions, colon, F507
 binding sites, circulating mononuclear leukocytes, E388
 compensatory adrenal growth and, E450
 glomerulosa cell responsiveness and, E209
 hypoxic pressor reactivity and, lung, H55
 plasma concentration, atrial natriuretic factor, awake state, R495
 potassium excretion and, kidney, F602
 potassium recycling and, kidney, adrenalectomy effects, F219
 production, calcium efflux effects, adrenal glomerulosa cells, E36
 salt and fluid absorption, small intestine, G133
 secretion
 calcium in, E89
 calcium antagonist effects, sodium depletion and (sheep), E676
 sodium ion transport and bladder (toad), C102
 distal colon, G424
 sodium transport and, colon, G124
 stimulation of transmethyations, sodium transport and (toad), F43
 uptake, bladder (toad), C88
- Alinidine, chronotropic and parasympatholytic effects, heart, H324
- Alkaline, gastroduodenal secretion, intestinal hormone effects, awake state, G687
- Alkaline gland, electrolyte transport (skate), R346
- Alkaline phosphate, biliary excretion of, tauroursodeoxycholate prevention of, G407
- Alkalosis
 biliary bicarbonate secretion and, ursodeoxycholate-induced, G20
 diuretic-induced, citrate excretion in acid-base balance, F796
 metabolic, parathyroid hormone, calcium ion, vitamin D, and inorganic phosphate effects, F739
- Allometry, mitochondria, tissue and, metabolism, R415
- Alloxan
 diabetes
 adrenergic sensitivity and, heart, neonate (lamb), H125
 myocardial mechanics and, H729
- Aluminum, phosphate and, renal handling, F64
- Amiloride
 bicarbonate absorption and, cortical thick ascending limb, F821
 cytoplasmic pH, changes, neutrophils, C379
 diuretic action, distal tubules, F527
 hydrogen transport and, papillary collecting duct, kidney, C241
 inhibition of acidification, proximal tubular, F773
 intracellular pH, skeletal muscle fibers (frog), C330
 microelectrode studies, antral mucosa (toad), G574
 permeability and, urinary bladder (toad), F56
 sensitivity, colon, F507

- sodium and potassium transport and, cortical collecting duct, F858
sodium ion transport and distal colon, G424
skin (frog), C457
sodium transport pool, epithelia, F308
transport, ammonia effects, cortical collecting tubule, F631
- Amines**
uptake, pulmonary, E292
vasoactive, vascular smooth muscle cell movement and, C252
- Amino acids**
branched-chain, metabolism, parenteral nutrition and, E409
carbobenzoxy, cholecystokinin receptor antagonist activity (guinea pig), G479
excretion, kidney, aging effects, R282
intraluminal, pancreatic exocrine response to, cholecystokinin effects, G347
metabolism, activation by exercise, R166
recycling, prolonged isotope infusion, E482
reflex, pyloric opiate-mediated, G307
transport
 endotoxic shock, soleus muscle, R142
 muscle, after exercise, E546
 renal outer cortical brush-border membrane, F869
 γ -Aminobutyric acid, pentose shunt activities and, brain, satiety level and, R453
p-Aminohippurate, clearance, renal function and, F753
 α -Aminoisobutyric acid transport
 endotoxic shock and, soleus muscle, R142
 muscle, after exercise, E546
- Aminophylline**
functional hyperemia and, H1
infusion, maintenance of renal autoregulation, F366
- Aminopyrine**, acid secretory response, gastric cells, G360
- Ammonia**
adenosine deaminase activity and, contracting fast-twitch muscle, C43
aerobic metabolism, fast-twitch muscle, C37
carbon dioxide interaction and, cerebral blood flow and oxygen consumption, H500
transport
 bladder, hydrogen secretion and (turtle), F720
 kidney, F459
transport inhibition, cortical collecting tubule, F631
- Ammoniogenesis**
renal
 maleate-induced glutamine metabolism, F585
 regulation of, acidosis and, F607
Ammonium, regulation of, acidosis, F607
- Amphiphiles**
charged, heart contractility, calcium transport and, H147
sodium-potassium-ATPase, inhibition of, H75
- Amygdala**, afferent cardiovascular pathways to, R38
- Amylase**
output, pancreatic, C235
- release, cholecystokinin receptor antagonist activity (guinea pig), G479
residual stimulation, pancreatic acini, G196
- secretion**
 nicotine stimulation of, pancreatic acini, G158
 pancreatic acini, C535
 pancreatic acini (guinea pig), G98
- Androgens**
bile acid sulfotransferase and, hepatic, G639
reproductive tract fluids, male, E274
- Anemia**
oxygen uptake and, intestine, neonate (lamb), G432
temperature regulation and (lizard), R595
- Anesthesia**
atriopeptins, renal-specific vasodilators, H587
fasting and, lower esophageal sphincter pressure in (opossum), G398
plasma catecholamines and, temperature, heart rate, and blood pressure, E95
vasopressinergic neuron function, E155
- Angiotensin**
blockade, hepatic clearance of renin after, R23
central, hemorrhage, R363
peripheral administration, plasma vasopressin response, awake state, R249
plasma, ADH, prostaglandin, and water excretion and, F254
prostaglandin E₂ and, mesangial cells, C119
receptors: *see* Receptors
transport responses and, kidney tubules, F621
- Angiotensin II**
adenosine interactions, glomerular filtration, F340
blood pressure and vascular reactivity, phosphate effects, F93
calcium efflux and, aldosterone production, adrenal glomerulosa cells, E36
central, brain, thermoregulation and (sheep), R371
dopamine and, central effects, sodium depletion and (sheep), R541
prolonged stimulation, glomerulosa cell responsiveness and, E209
prostaglandin synthesis and, mesangial cells, F240
receptors: *see* Receptors
vascular reactivity and, F674
vasoconstrictor action and, renal arterioles, F779
- Angiotensin II antagonists**, oral contraceptive hypertension and, awake state, H695
- Anions**
ATPase activity, intestinal mucosa, R241
conductance, gastric mucosa (bullfrog), G443
organic
 albumin-bound, Disse fluid effects, hepatic, G709
 excretion, diuretic-induced alkalosis, F796
 nephron, F404
transport inhibitors, urinary bladder (toad), F594
- transport pathways, volume regulatory response of lymphocytes, C480
- Anoxia**
ion homeostasis and redox status, brain (turtle), R531
ischemic conduction failure, diabetic neuropathy, E457
lactate production, nephron, F522
Anthracene-9-carboxylic acid, chloride secretion and, proximal tubules (shark), F282
- Antibiotics**, macrolide, interdigestive migrating contractions, gastrointestinal tract, G320
- Antidiuresis**, response to AVP and dDAVP, central and nephrogenic diabetes insipidus, F354
- Antidiuretic hormone**: *see also* Vasopressin
cerebrospinal fluid regulation, E346
microfilaments and, water permeability, C183
osmoregulation and, pregnancy, R29
osmotically stimulated, reflex control of, R660
plasma, angiotensin II effects, F254
prostaglandin E₂ synthesis and, collecting tubules, neonatal and adult, F134
receptors: *see* Receptors
release, osmotic thirst and, R645
thermal responses to, brain (sheep), R371
urea and sodium permeabilities, urinary bladder (toad), F56
water permeability regulation, urinary bladder (toad), F260
- Antigens**, cell-specific, immunodissection, F1
- Antihistamine**, H₁, endotoxin-induced corticosterone secretion, E26
- Antihypertensive factor**, erythrocytic, H445
- Antimycin A**, lactate production, nephron, F522
- Antipyrine**, autoradiography, gastroduodenal blood flow, G539
- Antiserum**
salt acclimation, kidney (duck), F663
vasoactive intestinal peptide, gastric relaxation and (guinea pig), G73
- Antral mucosa**, microelectrode studies (toad), G574
- Antrum**
gastric, silver effects (bullfrog), G443
smooth muscle plasma membrane, high-affinity calcium-ATPase, C449
- Aorta**
cultured endothelial cells, coronary vasoconstrictor produced by, C550
thoracic
 baroreceptor resetting, vessel wall and, H843
 diffusional support of arteries, H901
- Aortic bulb**, hemodynamics, ventricle-systemic arterial interaction, H132
- Apamin**, depression of inward slow channels, heart muscle, H961
- Apical membrane**
conductance, hydrogen-potassium-ATPase-rich vesicles, G595
silver effects, gastric mucosa (bullfrog), G443
- Apyrase**, relaxation, platelets, H389
- Arabinofuranoside**, plasma and urinary adenosine, kidney, F545

- Arabinose, permeability, blood-brain barrier, H712
- Arachidonic acid
gastric microcirculation and, G580
metabolism, pulmonary hypertension and, H859
oxygen consumption, cerebral arterioles, H534
release, growth hormone-releasing factor and, anterior pituitary cells, E438
- Arachidonic acid
bradykinin effects, tracheal epithelium, F48
endothelium-dependent contractions, cyclooxygenase and, H432
intestinal motility, prostaglandin effects, G353
prostaglandin effects
dopamine actions, pancreas, G110
renal arterioles, F779
prostaglandin E₂ synthesis and, collecting tubules, neonatal and adult, F134
- Arginine vasotocin: see Vasotocin
- Arrhythmias
spontaneous oscillations, cardiac cells, H412
ventricular, phenothiazine suppression of transient depolarizations, H291
- Arterial wall, diameter growth, flow restriction and, H540
- Arteries: see also specific artery
diffusional support, H901
transmural transport, mathematical model, H240
- Arterioles
blood platelets, distribution of flow, H318
cerebral, oxygen radical effects, H157
efferent, estimating oncotic pressure, F444
renal
response to acetylcholine, dopamine, and bradykinin, F183
vasoconstrictor action, prostaglandin effects, F779
- Arteriosclerosis, transmural transport, mathematical models, H240
- Arteriovenous difference, cerebral glucose use, C170
- Aschoff's rule, extraretinal photoreception (lizard), R407
- Ascites, simulated, cardiovascular responses to, R208
- Asialoglycoprotein, uptake and disposition, liver, G450
- Aspirin
high-dose, pulmonary hemodynamics and lung water, H225
urine osmolality and, angiotensin II effects, F254
- ATPase: see Adenosine triphosphatase; Bicarbonate-ATPase; Hydrogen-potassium-ATPase; Magnesium-ATPase; Sodium-potassium-ATPase
- ATP: see Adenosine triphosphate
- Atriopeptins, renal-specific vasodilators, awake state, H587
- Atrioventricular junction, sinus node and, autonomic regulation, alinidine effects, H324
- Atrioventricular node artery, alinidine effects, H324
- Atropine
adenosine and, ventricular automaticity, H907
exocrine secretion and, pancreas (pig), G281
gastric, response to sham feeding, G188
pepsinogen secretion (frog), G79
reflex bradycardia, anterior hypothalamic lesions and, H937
renal arteriolar response, F183
somatostatin release, bombesin effects, G1
vagotomy, exocrine pancreatic secretion and, G532
- Autodigestion, gastric mucosal barrier, G643
- Automaticity, ventricular, adenosine effects, H907
- Autonomic function, heart rate analysis, H151
- Autonomic nerves, regulation of gastric hormones, pirenzepine, G184
- Autonomic nervous system
bombesin effects, H425
insulin-induced hypoglycemia, glucose turnover during, liver denervation and, E327
refractoriness, His-Purkinje system, R515
- Autonomic regulation, sinus node, atrioventricular junction and, alinidine effects, H324
- Autoradiography
angiotensin II, dehydration and, anterior pituitary, E264
blood flow, sciatic nerve, H311
cerebral glucose use, C170
gastric mucosa, blood flow, G539
quantitative
peritoneal absorption of macromolecules, H26
peritoneal-plasma transport, F425
sodium-pump density of cells, tracheal mucosa, C389
spontaneous hypertension, brain neurons, C488
uridine incorporation, collecting tubules, DOCA effects, F552
vitamin D₃ binding, tubular segments, F296
- Autoregulation
capillary pressure, filtration rate and, hindquarter, H835
coronary circulation, vasopressin effects, H516
coronary vasodilator reserve, functionally significant flow reduction effects, H403
prostaglandins, pressure natriuresis, renal, F8
renal, aminophylline and adenosine infusion, F366
- Awake state
atrial natriuretic factor, renal response, R495
atriopeptins, renal-specific vasodilators, H587
bombesin effects, central nervous system, H425
circadian rhythms, automated recording, R320
dopamine and angiotensin II effects, central nervous system (sheep), R541
fasting and, lower esophageal sphincter pressure (opossum), G398
gastroduodenal alkaline secretion, gut hormone effects, G687
- glucagon effects, hepatic lactate metabolism, E463
hyperonic sodium chloride infusion, vasopressin effects, H652
intracoronary acetylcholine, reflex cardiovascular effects, H930
lymph enzymes, cardiac, ischemia, H350
plasma catecholamines, cardiac performance and, H82
plasma vasopressin response, peripheral administration of angiotensin, R249
postprandial regulation, renal hemodynamics, F656
pressor responses, vasopressin in hypertension, H49
red cell measurement, splenic (pig), R293
renin-angiotensin mechanisms, oral contraceptive hypertension, H695
sodium concentration, renal nerves and, F616
thermal responses, central angiotensin II, SQ 20881, and dopamine infusion (sheep), R371
vasopressinergic neuron function, E155
volume expansion, renal nerve activity, F15
- B**
- Bacitracin, insulin degradation, hepatocyte plasma membrane, E194
- Barium
pharmacology of transport, S49 lymphoma cells, C51
potassium and chloride transport, distal tubules, F638
transport, alkaline gland (skate), R346
- Barodenervation, circulatory response, onset of exercise and, H457
- Basolateral cell membrane, amplification, prolonged furosemide treatment, F374
- Basolateral membrane, renal, high-affinity calcium binding sites, F472
- Basolateral membrane vesicles, renal, urate transport, F574
- Basolateral plasma membrane, taurocholate transport, developing liver, G648
- B cells, phorbol esters actions, electrical activity and, C527
- Benzyl alcohol, parathyroid hormone receptor-adenylate cyclase system, kidney, E31
- Bethanechol
pepsinogen secretion (frog), G79
somatostatin release and, G1
- Bicarbonate
absorption
omeprazole inhibition of hydrogen secretion, jejunum (frog), G256
proximal tubules, model, F272
sodium-dependent, cortical thick ascending limb, kidney, F821
ammonia transport and, bladder (turtle), F720
flame values and, cerebrospinal fluid and plasma, R621
gastric secretion, sham feeding, G188
plasma concentration, diuretic-induced alkalosis, F796
propionate and, electrophysiological effects on gallbladder (mudpuppy), C58

- reabsorption
 - chronic respiratory acidosis, F492
 - early proximal tubule, F113
 - transport, alkaline gland (skate), R346
 - ursodeoxycholate-induced biliary secretion, acid-base balance and acetazolamide effects, G20
 - Bicarbonate-ATPase, mitochondrial origin of, brush border membranes of proximal tubules, F389
 - Bifurcations, microvascular, blood cell distribution and, H568
 - Bile
 - flow
 - acid-base balance and acetazolamide effects, G20
 - drop-counting computer, H286
 - glutathione and methylmercury secretion into, sulFOBromophthalein inhibition of, G238
 - intestinal mucosal hyperemia and, laser-Doppler blood flowmetry and, G393
 - Bile acids
 - bicarbonate secretion, acid-base and acetazolamide effects, G20
 - small intestine, G485
 - sulfotransferase, hepatic, androgen and estrogen effects, G639
 - transport, developing liver, G648
 - Bile salts, biliary protein excretion, tauroursodeoxycholate prevention of, G407
 - Biliary excretion, polymeric immunoglobulin, G450
 - Biliary secretion, glutathione disulfide, sulFOBromophthalein inhibition of, G238
 - Bioassay, atrial extracts, natriuretic activity, F314

 Breathing: *see* Respiration
 Bretium, functional control of heart rate, neonate, R601
 Brown fat
 β -adrenoreceptors in, E397
 cafeteria diet and (hamster), E230
 cAMP metabolism and lipolysis, cafeteria diet and (hamster), E224
 chronic obesity, diet-induced, R717
 energy deficit, recovery from (hamster), R439
 guanosine diphosphate binding and thermogenin, cold exposure and, C365
 lipectomy, fat deposition and, R231
 mitochondria, interaction of fatty acyl-CoA esters with (hamster), E639
 skeletal muscle and, ephedrine-induced thermogenesis and, E507
 sympathoadrenal activity, hypothalamic obesity and, E607
 thermogenesis, food restriction effects, E531
 ventromedial hypothalamic lesions and, E20
 Brush-border membrane
 cortical, cation dependent, L-glutamate transport, F869
 proximal tubules, bicarbonate-ATPase in, F389
 recycling, after ischemia, F804
 renal, fluidity, sodium-hydrogen exchange, F212
 small intestine, iron uptake in, G376
 Brush-border membrane vesicles
 hepatopancreatic, glucose transport (lobster), R133
 intestinal, glycyl-L-proline effects, G682
 jejunal, D-glucose uptake, G87
 proximal tubule, proton/hydroxyl permeability, F78
 renal
 phosphate transport, pH effects, F705
 sodium-hydrogen exchange, glucocorticoid activation of, F233
 sodium-hydrogen exchange, parathyroid hormone and dibutyl cAMP inhibition of, F212
 urate transport, F574
 water and urea transport, F650
 Buffer response, arterial flow, hepatic, adenosine effects, H331

C

Caerulein, satiety and, in obesity, G277
 Caffeine
 drinking responses, after nucleus medialis lesions, R224
 excitation-contraction coupling, cardiac, H366
 Calcium
 absorption and secretion, small intestine and colon, G147
 adrenal steroid secretion, adenosine monophosphate, cyclic-stimulated, E39
 bone, exercise, ovariectomy and, R12
 bone mineral loss, during lactation, E182
 bound, mobilization of, pituitary cells, E64
 cholecystokinin-stimulated phosphoinositide breakdown, exocrine pancreas (guinea pig), G551

cytoplasmic, adenosine-mediated smooth muscle relaxation (ferret), H109
 cytoskeleton, cell volume regulation, gallbladder (frog), C27
 depletion, low sodium attenuation, myocardium, newborn, H345
 efflux, aldosterone production and, adrenal glomerulosa cells, E36
 excitation-contraction coupling, cardiac, H366
 excretion, renal and extra-renal (teleost), R18
 extracellular, vascular smooth muscle cells, C436
 gap junction, regulation of conductance, H753
 gastric emptying and, R479
 gastrointestinal hormone release and, G28
 gentamicin nephrotoxicity, F332
 high-affinity, binding sites, luminal and basolateral renal membranes, F472
 homeostasis, alteration by endotoxin, adipocytes, R331
 intracellular
 glomerular filtration, spontaneous hypertension and, F668
 stoichiometry and electrogenicity, C189
 ionized, sarcoplasmic, skeletal muscle (frog), C520
 kinetics, endotoxin effects, adipocytes, R331
 loading, mitochondrial, ischemic renal failure and, F845
 metabolism
 cholinergic stimulation of acid secretion, G216
 vitamin D₃ metabolite effects, embryo (chick), E281
 on and off response, ureter (guinea pig), C165
 oscillations, stimulation of, cardiac cells, H412
 pepsinogen secretion and (frog), G79
 pharmacology of transport, S49 lymphoma cells, C51
 pH-mediated flux, calvariae, neonatal, F785
 potassium and chloride secretion and, colonic, G103
 potassium efflux and, iodoacetic acid inhibition of, erythrocytes, C419
 prostaglandin I₂ production, endothelial cells, C127
 protein kinase and, pancreatic acinar cells, G692
 secretory and redox response, cholecystokinin octapeptide-8, pancreas, C228
 serum-stimulated sodium ion influx and, normal and transformed cells, C288
 transport
 diploid fibroblasts, C154
 distal tubules, F527
 heart contractility and, charged amphiphiles, H:47
 membrane damage and, renal cortical mitochondria, F876
 vitamin D₃ and calcium channel blocker effects, cecum, G676
 uptake
 aortic segments, H445
 reserpine effects, pituitary cells, E15
 Calcium antagonists
 aldosterone secretion and, sodium depletion (sheep), E676

glomerular responses, spontaneous hypertension, F668
 myocardial dysfunction and, endotoxin shock, H818
 Calcium-ATPase, antrum smooth muscle, plasma membrane, C449
 Calcium channel
 hormone secretion, dihydropyridine inhibition of, pituitary cells, C510
 slow, heart muscle, H961
 voltage-dependent, reserpine effects, pituitary cells, E15
 Calcium channel antagonists, adenosine transport and, erythrocytes, H593
 Calcium channel blockers
 1,25-dihydroxyvitamin D₃ and, calcium transport, cecum, G676
 magnesium transport and, S49 lymphoma cells, C51
 Calcium ions
 blocking agent, heart muscle and, H961
 interrelations, parathyroid hormone, vitamin D, and inorganic phosphate in acid-base balance, F739
 intracellular levels, pancreatic acini, C535
 permeability, vascular smooth muscle cells, C436
 proximal reabsorption, parathyroid hormone effects, F100
 signaling mechanisms, liver, C203
 Calcium ion paradox, low sodium attenuation, myocardium, newborn, H345
 Calcium-magnesium, high-affinity, antrum smooth muscle plasma membrane, C449
 Calmodulin
 calcium ion regulation and, sodium and chloride transport, ileal, G726
 cell volume regulation, gallbladder (frog), C27
 channel gate, cell coupling, H765
 inhibitors, luminal and basolateral renal membranes, F472
 potassium and chloride secretion, colonic, G103
 serum-stimulated sodium ion influx and, normal and transformed cells, C288
 transient depolarization, ventricular cells, H291
 Calories
 fetal growth and (guinea pig), E132
 gastric emptying and, R479
 variable restriction, ingested energy utilization and, R549
 Camera lucida, cell geometry and innervation, stellate ganglion, R288
 cAMP: *see* Adenosine monophosphate, cyclic
 Capacitance
 coronary
 pressure and tone dependence, H700
 pressure effects, H170
 Capillaries
 distribution, microvascular bifurcations, models, H568
 endothelium, albumin absorption to, H264
 exchange capacity, regulation of, stomach, G437
 filtration: *see* Filtration
 intestinal circulation, microsphere passage, H217
 left ventricular failure, myocardial infarction and, H883
 permeability: *see* Permeability
 pressure: *see* Pressure

SUBJECT INDEX TO VOLUME 248

- transport, peritoneal cavity and plasma, H15
- Capsaicin
 - muscularis mucosa, esophagus and (opossum), G655
 - pretreatment, cholecystokinin satiety and, R501
- Captopril
 - renin-angiotensin system, drinking behavior and (flounder), R157
 - renin clearance and, hepatic, R23
 - sodium chloride intake and, R1
- Carbachol, GIP-mediated insulin release and, pancreatic lobules, E299
- Carbamoyl-phosphate synthetase I, activity, ureagenesis activity and, regenerating liver, G501
- Carbon, fetal growth and (guinea pig), E132
- Carbon dioxide
 - air sacs (penguin), R748
 - cerebral blood flow and, oxygen consumption, H500
- Carbonic anhydrase
 - ammonia transport, kidney, F459
 - bicarbonate secretion, acid base and acetazolamide effects, G20
 - hydrogen ion secretion and, bladder (turtle), R584

 - control, expired air temperature (reindeer), R679
 - corticosterone regulation, R161
 - dopamine and angiotensin II effects, sodium depletion and (sheep), R541
 - neuromodulator, gastrointestinal motility, G15
 - resetting, elevated pressure and, H827
- Cerebral vessels, vasomotor response, hormonal norepinephrine, H232
- Cerebrospinal fluid
 - artificial, salt acclimation and (duck), F663
- 6-mercaptopurine disposition, model (monkey), R147
- plasma and, sodium and potassium differences, R621
- regulation, plasma vasopressin and, E346
- vasopressin in, dehydration, postural changes, and nausea, R78
- Channels, cell-to-cell, calmodulin-driven, H765
- Chest, microwave warming, circulatory arrest, hypothermia and, R308
- 2-Chloroadenosine, adenylate cyclase and, heart, H737
- α -Chloralose, nicotine, renal and splanchnic blood flow, H360
- Chlordiazepoxide, body fat deposition, insulin effects, R120
- Chloride
 - conservation, renal, dietary potassium depletion and mineralocorticoid excess effects, F104
 - flux, volume regulatory response of lymphocytes, C480
 - loop segment uptake, prostaglandin inhibitor effects, furosemide diuresis, F698
 - plasma, volume expansion and rectal gland stimulation (dogfish), R638
 - potassium transport and, distal tubules, F638
 - secretion
 - bradykinin effects, tracheal epithelium, F48
 - colonic, cAMP and calcium in, G103
 - colonic carcinoma cell line Caco-2, C410
 - electrophysiological evidence, proximal tubules (shark), F282
 - volume expansion and rectal gland stimulation (dogfish), R638
 - space, renal membrane vesicles, F574
 - sudden potential drop, gastric mucosa (bullfrog), G587
 - transport
 - alkaline gland (skate), R346
 - diploid fibroblasts, C154
 - ethanol effects, gastric mucosa, G299
 - ileal, calmodulin in calcium ion regulation, G726
 - potassium depletion and, Henle's loop, F682
 - transport regulation, hydrogen-potassium-ATPase-rich vesicles, G595
- Chloride-hicarbonate, ATPase, intestinal mucosa (frog), R241
- Chlorothiazide, diuretic action, distal tubules, F527
- Cholecystokinin
 - alkaline secretion and, gastroduodenal, G687
 - control, ingestive behavior and body weight (hamster), R686
 - lipid-induced hyperemia and, G208
 - N-terminal fragments, pancreatic acini (guinea pig), G98
 - pancreatic response and, intraluminal amino acids and fat, G347
 - propulsion, jejunal, G470
 - pyloric response, response to intraduodenal amino acids, G307
 - receptors: *see* Receptors
 - release, divalent cation effects, G28
 - satiety, capsaicin pretreatment and, R501
 - secretion, pH change effects, pancreas, C235

- Cholecystokinin (*continued*)
 somatostatin release, fundic mucosal cells, G569
 Cholecystokinin octapeptide, pancreatic growth, blood flow and, G61
 Cholecystokinin octapeptide-8, calcium-dependent secretory and redox response, pancreas, C228
 Cholecystokinin-pancreozymin, intracellular calcium levels, pancreatic acini, C535
 Cholesterol, plasma viscosity and, E10
 Cholinergic agents, intracellular calcium levels, pancreatic acini, C535
 Cholinergic stimulation, acid secretion, calcium metabolism during, G216
 Chromaffin tissue, extra-adrenal, functional control of heart rate, neonate, R601
 Chromatography, gas, sustained water diuresis effects, prostaglandin E₂ excretion, F830
 Chylomicrons, intestinal, G164
 Circadian dependence, drinking responses, after nucleus medianus lesions, R224
 Circadian rhythm: *see* Rhythms
 Circadian timing, adrenal corticoids and (hamster), R434
 Circulation: *see also* Blood flow; Microcirculation
 coronary, vasopressin effects, H516
 glomerular, verapamil effects, F668
 intestinal, microsphere passage through, H217
 mesenteric, prostaglandins and, G353
 pulmonary, prostaglandin effects, fetal (lamb), H853
 renal, nerves and prostaglandins in, F810
 response to onset of exercise, H457
 splanchnic, portal hypertension mechanisms, model, G618
 splanchnic nerve stimulation effects, development (swine), H69
 Circulatory arrest, hypothermia, survival after, R308
 Cisplatin, S49 lymphoma cells, C51
 Citrate
¹⁴C-labeled, specific activity ratios, tri-carboxylic acid cycle analysis, E252
 excretion, acid-base balance, diuretic-induced alkalosis, F796
 Clearance
 inulin
 measurement of glomerular filtration rate, F734
 salt acclimation and (duck), F663
 metabolic, insulin turnover and, E203
 osmolar, cold temperature and immersion effects, R560
 Cobalamin, uptake and release, intestinal, G326
 Cobalt, excitation-contraction coupling, cardiac, H386
 Coenzyme A
 malonyl, training and fasting, postexercise ketosis, R63
 metabolism, E1
 Cold
 exposure, guanosine diphosphate binding and thermogenin, cold exposure and, C365
 water immersion and, urinary responses to, R560
 Collagen, pregnancy-induced changes (sheep), H658
 Colon
 aldosterone effects, transport in target tissues, F507
 calcium absorption and secretion, G147
 carcinoma cell line, epithelial properties of, C410
 descending, sodium transport pool, F308
 distal
 conductive pathways of transport (guinea pig), G176
 sodium ion transport, corticosteroid effects, G424
 glycoprotein secretion, G54
 isolated cells, comparison (guinea pig), C271
 sodium transport, steroid hormone effects, G124
 Colostrum, gastric emptying, milk, pup, R732
 Comparative physiology: *see* Species differences
 Compliance
 aortic bulb, ventricle-systemic arterial interaction, H132
 arterial, stroke volume and, H477
 cardiovascular responses, simulated ascites, R208
 chamber, left ventricular, genetic obesity and, H438
 diastolic, myocardial ischemia effects, H719
 interstitial, transcapillary Starling pressure and, skin and skeletal muscle, H666
 venous, liver, norepinephrine effects, H468
 Computer studies
 afterload, stroke volume and, H477
 drop-counting flow, H286
 Concanavalin A, hydrogen ion secretion and, bladder (turtle), R584
 Conceptus, number, prolactin surges and, F269
 Conductance, regulation, gap junctional, H753
 Conductivity, hydraulic, albumin modulation, capillary permeability, H264
 Connective tissue, content, pregnancy-induced changes (sheep), H658
 Copper, urate transport, renal membrane vesicles, F574
 Coronary artery
 diameter, pressure effects on blood velocity, H170
 platelet relaxation, adenine nucleotides and, H389
 vasoconstriction, cultured endothelial cells, C550
 Coronary flow: *see* Flow
 Coronary occlusion
 ischemia effects, H719
 myocardial reactive hyperemia after, intracoronary adenosine effects, H812
 Corpus striatum, temperature, dopaminergic drugs and, R108
 Corticoids, adrenal, circadian timing and (hamster), R434
 Corticosteroids
 cellular heterogeneity, collecting tubules, F552
 sodium ion transport and, distal colon, G424
 Corticosterone
 adrenal, circadian timing and (hamster), R434
 endotoxin-induced secretion, suppression by H₁-antihistamine, E26
 plasma, preoptic recess lesions and volume depletion effects, R161
 secretion, calcium in, E89
 sodium transport and, colon, G124
 Corticotropin, glomerulosa cell responsiveness and, E209
 Corticotropin-releasing factor
 central, fever-specific changes in, R125
 insulin release and, pancreas, E741
 urophysiology and (goldfish), R197
 Cortisol
 adrenal, circadian timing and (hamster), R434
 dynamics, seawater adaptation and (salmon), R651
 plasma, urophysiology and (goldfish), R197
 Coupling
 cell, functional modulation of, H765
 circulation-metabolism, myoglobin effects, rest-work transition, H914
 electrical, gap junctional conductance, H753
 excitation-contraction
 cardiac, calcium influx and release, H366
 glucocorticoid treatment effects, E363
 sodium-calcium exchange, C189
 sodium-phosphate flux, pH effects, renal brush-border membrane vesicles, F705
 sodium-sugar, intestines (chick), C498
 stimulus-secretion
 pancreatic, G692
 pancreatic acini, C535
 pepsinogen secretion (frog), G79
 Creatine kinase, lymph, cardiac, H350
 Creatine phosphate
 acidosis effects, muscle metabolism, heavy exercise, C337
 heavy exercise and, muscle, C109
 myocardial ischemia and, H644
 Creatine phosphokinase, acidosis effects, contracting fast-twitch muscle, C43
 Current
 inward slow, heart cells, guanosine monophosphate, cyclic effects, H745
 membrane, sodium-calcium exchange, C189
 short-circuit
 anion transport inhibitors, urinary bladder (toad), F594
 crystal accumulation and, urinary bladder, F70
 glucose transport, intestinal epithelia (flounder), R573
 salt and fluid absorption, small intestine, G133
 sodium ion transport, distal colon, G424
 sodium transport, steroid hormones and, colon, G124
 tumor promoters and, skin (frog), C457
 Current-voltage relations, electrogenic transport, distal colon (guinea pig), G176
 Cushing response, regional blood flow distribution, adrenergic blockade effects, H98

SUBJECT INDEX TO VOLUME 248

- Cyclic hormone, secretion, hepatocyte response, model, E681
- Cycloheximide
 - phosphate transport, LLC-PK₁ cells, F122
 - transport, inhibition by dexamethasone, adipocytes, E215
 - vitamin D₃ absorption and, intestinal, G718
- Cyclooxygenase
 - arachidonic acid, endothelium-dependent contractions, H432
 - bradykinin effects, tracheal epithelium, F48
 - lung water, pulmonary hemodynamics and, H225
 - venous compression and, renal hemodynamics, F810
- Cystic fibrosis, glycoprotein secretion, colonic, G54
- Cytochalasin B, cell volume regulation, gallbladder (frog), C27
- Cytochalasins, platelet-fibrinogen interactions, irreversible, C466
- Cytochrome
 - pH change, pancreatic function and, C235
 - redox state and secretion, pancreas, C228
- Cytochrome c oxidase, brush border membranes, proximal tubules, F389
- Cytochrome oxidase, redox status, ischemia effects, brain (turtle), R531
- Cytoprotection
 - chronic restraint, gastric mucosa, G35
 - prostaglandin effects, ethanol and sodium transport, gastric mucosa, G299
- Cytoskeleton
 - calcium and, cell volume regulation, gallbladder (frog), C27
 - platelet-fibrinogen interactions, irreversible, C466

D

- Dazmegrel, selective inhibition of thromboxane, renal function and, F753
- dDAVP
 - antidiuretic and prostaglandin responses to, F354
 - transmembrane potential and, papillary epithelial cells, F762
- Dead space, carbon dioxide, air sacs (penguin), R748
- Defibrillation, cardiac, β -adrenergic modulation of, anesthesia, H674
- Dehydration
 - angiotensin II receptors and, anterior pituitary, E264
 - cellular, vasopressin release and, R645
 - drinking responses, after nucleus medianus lesions, R224
 - vasopressin, cerebrospinal fluid, R78
- Denervation
 - kidney, volume expansion and, awake state, F15
 - selective, heart, H61
 - supersensitivity, hormonal norepinephrine, cerebral and hindlimb vessels, H232
- Denominators, multiple, in scientific paper, G380
- Deoxycorticosterone acetate
 - sodium chloride intake and, R1
- uridine incorporation, collecting tubules, F552
- Deoxyglucose
 - dose-response curves, insulin, tissue sensitivity, E353
 - incorporation, thermoregulation, R84
 - insulin action, heterogeneity of, muscles, E567
 - metabolism, muscle, exercise and, E575
- 2-Deoxyglucose, uptake, isoproterenol effects, adipocytes, E706
- Deoxyribonucleic acid
 - after postnatal hypothyroidism, heart cells, E381
 - pancreatic, blood flow relations, G61
 - pregnancy-induced changes (sheep), H658
 - prostaglandin effects, gastroduodenal mucosa and pancreas, G170
 - synthesis, liver regeneration and, E618
- Depolarization
 - cortical, brain ischemia (gerbil), R99
 - sarcoplasmic calcium and, skeletal muscle (frog), C520
- Desensitization
 - gonadotropin-releasing hormone receptor function, dynamic model, R312
 - pulsatile glucagon stimuli, hepatocyte response, E681
- Desferrioxamine, transferrin and iron release, hepatocytes, G93
- Desynchronization, circadian rhythms (monkey), R567
- Development: *see also* Growth; Maturation
 - embryonic, vitamin D and (chick), E281
 - intestinal membrane lipid composition and fluidity, G200
 - kidney, prostaglandin E₂ synthesis and, neonatal and adult, F134
 - liver, taurocholate transport, basolateral plasma membrane, G648
 - splanchnic nerve stimulation, circulatory effects (swine), H69
 - spontaneous hypertension, disordered drinking and, R464
- Dexamethasone
 - inhibition of hexose transport, adipocytes, E215
 - potassium recycling and, adrenalectomy effects, kidney, F219
 - sodium-hydrogen exchange, renal brush-border vesicles, F233
 - sodium ion transport and, distal colon, G424
 - sodium-potassium-ATPase and, nephron segments, F487
 - sodium transport and, colon, G124
- Dextran, capillary filtration coefficient and, hindlimb, H452
- Diabetes
 - adrenergic sensitivity, heart, neonate (lamb), H125
 - alanine transport and, liver plasma membrane vesicles, E581

Diuresis (*continued*)
 sustained, prostaglandin E₂ excretion, F830
 DNA: see Deoxyribonucleic acid
 DOCA: see Deoxycorticosterone acetate
 Dopamine
 action, prostaglandin effects, pancreas, G110
 angiotensin II and, central effects, sodium depletion and (sheep), R541
 arteriole response to, renal, F183
 infusion, thermal responses to, brain (sheep), R371
 low-protein diet and, sympathetic nervous system, R627
 Dopaminergic drugs, neuronal responses, scrotal temperature, R108
 Dopaminergic pathway
 brain, thermal responses (sheep), R371
 sodium depletion and, central nervous system (sheep), R541
 Dose-response relations, insulin sensitivity, individual tissues, E353
 Drinking
 body weight and, abdominal vagus regulation (hamster), R636
 disordered, spontaneous hypertension and, R464
 endogenous renin-angiotensin system and (flounder), R157
 hyperdipsia, nucleus medianus lesions and, R214
 impaired response, nucleus medianus lesions, R224
 osmotic thirst, vasopressin release and, R645
 rehydration, plasma vasopressin levels and (sheep), R68
 thirst, vasopressin secretion and osmolality, pregnancy, R29
 Ductus arteriosus, prostaglandin effects, fetal (lamb), H853
 Duodenum, calcium absorption and secretion, G147

E

Eating: see Feeding
 Edema
 plasma volume expansion and, Heymann nephritis, F247
 prevention, interstitial compliance and, H666
 pulmonary, high-dose aspirin effects, H225
 Elasmobranch
 chloride secretion, proximal tubules (shark), F282
 pericardium and pericardioperitoneal canal function in (fish), H198
 Electrical activity, B cells, phorbol ester effects, C527
 Electrochemical profile, potassium and sodium, distal tubule (frog), F266
 Electrodes, ion selective, cerebrospinal fluid and plasma sodium and potassium differences, R621
 Electrogenicity, sodium-calcium exchange, C189
 Electrogenic transport, distal colon (guinea pig), G176
 Electrolytes
 absorption
 distal colon (guinea pig), G176
 weak, G380

excretion, kidney, aging effects, R282
 transport
 alkaline gland (skate), R346
 target tissues, colon, F507
 weak, low-pH microclimate, intestines, G608
 water and, transport, small intestine, G485
 Electromyography, pattern generator for locomotion, model, R484
 Electronic barostat, gastric tone, physiological variations in, G229
 Electron microscopy: see Microscopy
 Electron probe microanalysis, ion transport, diploid fibroblasts, C154
 Electrophoresis, free-flow, renal membrane vesicles, F574
 Electrophysiology
 cardiac, guanosine monophosphate, cyclic effects, H745
 medullary collecting duct, F500
 prostaglandins, sodium transport and, gastric mucosa, G299
 regulation of propagation, gastric smooth muscle, G512
 ELISA: see Enzyme-linked immunosorbent assay
 Embryo, calcium and phosphorus metabolism, vitamin D₃ metabolite effects (chick), E281
 Endocytic vesicles, kidney cortex, ATP-dependent hydrogen pump in, F835
 Endocytosis, receptor-mediated, epithelial cells, C12
 Endoneurium, blood flow, sciatic nerve, H311
 Endosomes, uptake of proteins, epithelial cells, C12
 Endothelial cells
 cell-bound insulin processing, E244
 cultured, coronary vasoconstrictor characterization, C550
 lactose-specific lectin binding and synthesis, lung, C258
 movement, vasoactive amine effects, C252
 prostaglandin I₂ production, α -toxin-induced, C127
 Endotoxemia, amino acid transport and, soleus muscle, R142
 Endotoxin
 calcium homeostasis and, adipocytes, R331
 corticosterone secretion, suppression by H₁-antihistamine, E26
 lethal and nonlethal doses, glucose kinetics and body temperature after, R471
 vasopressin release and, E420
 Energy
 activation, proximal tubule brush border vesicles, F78
 aerobic rest-work transitions, glycolysis in, H922
 deficit, recovery from (hamster), R439
 ingested, utilization of, variable caloric restriction effects, R549
 Energy balance
 ammoniogenesis, regulation of, renal, F607
 regulation
 satiety and brain metabolism, R447
 satiety level and, R453
 utilization, variable caloric restriction effects, R549

Energy metabolism
 ischemic conduction failure, diabetic neuropathy, E457
 oxygen dependence of, contracting skeletal muscle, H40
 thermic effect of meals, E370
 Enkephalins, pyloric response, response to intraduodenal amino acids, G307
 Enteric nervous system
 propulsive behavior, jejunal, cholecystokinin-induced, G470
 pyloric response, response to intraduodenal amino acids, G307
 Enterocytes, phosphate fluxes, vitamin D metabolite effects, G40
 Enterogastrone, secretion, meal-stimulated, peptide YY effects, G118
 Enteroglucagon, hyperemia, gut hormones and, G208
 Enteroinsular axis
 GIP-mediated insulin release, carbachol effects, pancreas, E299
 intestinal insulinotropic effects, diabetes, E304
 Entrainment, range of, circadian rhythms (monkey), R567
 Enzyme-linked immunosorbent assay, guanosine binding and thermogenin, brown fat, C365
 Enzymes: see also specific enzyme activity, intestinal mucosa, R241
 Ephedrine, thermogenesis, brown fat and skeletal muscle contributions, E507
 Epidermal growth factor, measurements, plasma, method, ontogeny, and sex difference effects, E391
 Epididymis, reproductive tract fluids, androgens in, male, E274
 Epinephrine
 α -adrenergic phenomena and, E633
 epithelial properties, colonic carcinoma cell line Caco-2, C410
 glucose turnover, insulin-induced hypoglycemia, liver denervation and, E327
 low-protein diet and, sympathetic nervous system, R627
 plasma levels
 cardiac performance and, awake state, H82
 fasting and exercise, R302
 sympathoadrenal response, neonatal adaptation (sheep), E443
 turnover, hypothalamic obesity, brown fat, E607
 Epineurium, blood flow, sciatic nerve, H311
 Epithelial cells
 endocytic uptake of proteins, C12
 renal, biochemical characterization, F536
 renal papillary, transmembrane potential of, F762
 volume regulation, calcium and cytoskeletal involvement (frog), C27
 Epithelial membrane, conductance, dibutyryl-cAMP effects, Malpighian tubules, R339
 Epithelium: see also specific type or site salt gland
 isolation (shrimp), R702
 morphology of (shrimp), R709
 Epitrochlearis muscle, glucose uptake and glycogenolysis, catecholamine effects, C406

- Erythrocytes
adenosine transport, calcium channel antagonists and ions in, H593
antihypertensive substance and, H445
distribution, microvascular bifurcations, models, H568
fluorescent, statistical constraints on microvascular measurements, H577
geometry, viscosity and deformability, C473
membrane, polypeptide families in, C70
passage, narrow pores, C473
pH transients, dimethadione distribution measurement (rainbow trout), R668
potassium efflux, calcium-dependent, iodoacetic acid inhibition of, C419
storage, cardiac function and, H508
velocity, glucose-induced intestinal hyperemia, G521
volume, measurement, awake state (pig), R293
- Erythromycin, interdigestive migrating contractions and, gastrointestinal tract, G320
- Escherichia coli* endotoxin
alteration of calcium homeostasis, adipocytes, R331
glucose kinetics and body temperature after, R471
- Esophageal sphincter
lower
pressure, sleeve device functions as Starling resistor, G251
pressure, fasting and awake state effects (opossum), G398
- Esophagus
capsaicin effects (opossum), G655
smooth muscle cell membrane, electrical properties of (opossum), G342
- Estradiol
17 β -, gap junctions, myometrium, C296
sodium transport and, colon, G124
- Estradiol-17 β , vasodilation, α -receptors in (sheep), H339
- Estrogen
bile acid sulfotransferase and, hepatic, G639
sodium chloride intake and, R1
vasodilation, α -receptors in (sheep), H339
- Ethanol
chronic feeding, hepatic oxygen consumption and, G507
gastric mucosa, chronic restraint, vagotomy effects, G35
increased consumption, blood levels and, portacaval shunts, G287
sodium transport and, gastric mucosa, G299
- Euvolemia, bicarbonate and water reabsorption, early proximal tubule, F113
- Excitation-contraction coupling: see Coupling
- Exercise
activation, branched-chain keto acid dehydrogenase, R166
 α -aminoisobutyric acid transport, muscle, E546
endurance training, fasting and, postexercise ketosis, R63
fasting, plasma epinephrine in, R302
glucose metabolism, muscle, E575
glycogenolysis, nonexercising muscle, E540
heavy
acidosis effects, muscle metabolism, C337
muscle metabolism, hindquarter, C109
insulin binding and, muscle, E403
leg muscle, phosphorus nuclear magnetic resonance, C542
3-methylhistidine excretion, biphasic changes, E588
onset, circulatory responses to, H457
ovariectomy and, bone calcium, R12
oxygen dependence in energy metabolism, contracting skeletal muscle, H40
physical activity, insulin effects on body fat, R120
plasma catecholamine levels and, cardiac performance, H82
rest-work transition
aerobic, glycolysis in, H922
oxygen transport in, myoglobin effects, H914
running, 3-methylhistidine excretion after, E588
thermogenesis, insulin effects, skeletal muscle, E148
training
hypervolemia (greyhound), R422
mitochondria and myofibrils, spontaneous hypertension, H8
protein turnover and, muscle, E337
wheel-running activity, circadian rhythms, automated recording, R320
- Exocrine secretion, blood flow relations, G61
- Exocytosis
cytoplasmic pH, changes, neutrophils, C379
insulin release, E375
- Extensor digitorum longus, contractile properties, temperature dependence, C265

early proximal tubule, F113
uptake, renal papilla, vasa recta, F347
- F**
- Fanconi syndrome
glutamine metabolism, maleate-induced, kidney, F585
phosphate loading, renal tubular dysfunction and, F513
- Fasciculated cells, steroid secretion, calcium in, E89
- Fasting
awake state and, lower esophageal sphincter pressure (opossum), G398
endurance training and, postexercise ketosis, R63
exercise, plasma epinephrine in, R302
fatty acid reesterification, adipose tissue, E140
- Fat
body
deposition, insulin effects, R120
obesity-producing brain lesions, R46
deposition, brown fat lipectomy and, R231
digestion, oral stimulation effects, R459
fetal growth and (guinea pig), E132
pancreatic exocrine response, cholecystokinin effects, G347
preduodenal digestion, lipase secretion from gastric glands, G68
- Fatigue, aerobic metabolism and, fast-twitch muscle, C37
- Fatty acids
free
glucose and, sepsis, E236
sepsis effects, E732
metabolism, brain, satiety level and, R447
oxidation
diabetes and, heart, E602
satiety level and, R453
reesterification, adipose tissue, E140
synthetase, growth hormone effects, hepatocytes, E719
- Fatty acid synthetase, energy regulation and (hamster), R439
- Feedback, tubuloglomerular, nephron or ureteral obstruction and, F688
- Feeding
cafeteria diet
brown fat and (hamster), E230
cAMP metabolism and lipolysis, brown adipocytes (hamster), E224
dietary potassium, urinary excretion of prostaglandins and, F382
dietary protein, reduced, renal responses to, F31
diet-induced obesity, brown adipose and metabolic features of, R717
eating, disordered drinking, spontaneous hypertension, R464
electrogenic transport, distal colon (guinea pig), G176
fat deposition, brown adipose tissue lipectomy and, R231
food intake control
aging and metabolic rate and, E488
brain metabolism and, R447
brown fat thermogenesis and, E531
cholecystokinin, capsaicin pretreatment effects, R501
hypothalamic GABA and pentose shunt, R453
pituitary-testicular function and, R181
somatomedin C and, liver regeneration, E618
gastrin-releasing peptide effects (baboon), R578
glucoprivic, obesity-producing brain lesions, R46
histidine-free diet, kidney, E51
ingested versus tube-delivered, thermic effect of, E370
ingestion, suppression of, milk and, pup, R732
ingestive behavior, body weight and, abdominal vagus regulation of (hamster), R686
intra gastric, ventromedial hypothalamic lesions, R172
intra gastric oil meals, digestion, oral stimulation effects, R459
inulin infusion, glomerular filtration rate measurement, F734
low phosphate diet, phosphate restriction and parathyroidectomy, F175
low-protein, low-tryptophan diet, portacaval shunt and, G287
low-protein diet, sympathetic nervous system activity and, R627
meal-induced thermogenesis, palatability in, E75, E333
meals, size and composition effects, E101
pancreatic and gastric secretion, meal-stimulated, G118

Feeding (*continued*)

- parenteral nutrition, splanchnic substrate balance during, malnourishment and, E409
- physical activity and, insulin effects on body fat, R120
- radioactive meal, gastric emptying and, R479
- sham
 - effects on somatostatin release, G1

 - atrial natriuretic factor and, awake state, R495
 - bradykinin effects, F87
 - determinants of, parathyroid hormone effects, F482
 - dynamics, F163
 - kallikrein excretion, hypertension, F396
 - kidney, aging effects, R282
 - measurement with inulin, osmotic pump infusion, F734
 - nephron or ureteral obstruction, F688
 - pancreatic glucagon effects, F656
 - potassium excretion and, kidney, F602
 - regional rate, Ringer fluid effects, F851
 - renal calcium excretion (teleost), R18
 - selective inhibition of thromboxane and, F753

Filtration coefficient

- capillary, stomach, G437
- dextran and, hindlimb, H452
- Florescence anisotropy, benzyl alcohol effects, kidney, E31

Flow

- coronary
 - adenine pool depletion, myocardial, H644
 - reduced, prostaglandins and, myocardial ischemia, H493
- hepatic, norepinephrine effects, H468
- plasma
 - glomerular ultrafiltration dynamics, F163
 - renal, angiotensin II effects, F254
- reduction, coronary vasodilator reserve and, H403
- restriction, arterial diameter growth and, H540
- Flowmetry
 - blood, laser-Doppler, intestinal mucosal hyperemia, G393
 - computer, H286
 - laser Doppler, sciatic nerve blood flow, H311

Fluid

- absorption, amiloride-sensitive, small intestine, G133
- balance, measurement of glomerular filtration rate, F734
- cerebrospinal: *see* Cerebrospinal fluid
- flow, drop-counting computer, H286
- reproductive tract, male, androgens in, E274

Fluorescence

- blood platelets, distribution of flow, arterioles, H318
- ion movements in membrane vesicles, smooth muscle, C372
- Fluorescence anisotropy, membrane lipid composition, during development, G200

Fluoride, developmental changes and, liver, E712

Fluphenazine, transient depolarization, ventricular cells, H291

Follicle-stimulating hormone, Leydig cells, Sertoli cell interaction, E176

Force-velocity relations, diabetes effects, heart, H729

Forskolin

- developmental changes and, liver, E712
- electrical activity and, pancreatic β -cells, C145

epithelial properties, colonic carcinoma cell line Caco-2, C410

Freeze-fracture, plasma membrane, cardiac, H297

Fructose-1,6-bisphosphatase, activity, LLC-PK₁ cells, C181

Fucoidin, lactoferrin catabolism, liver, G8

Fundic mucosal cells, somatostatin release, cholecystokinin in, G569

Fundus, silver effects (bullfrog), G443

Furosemide

- administration, acid-base balance, diuretic-induced alkalosis, F796
- bicarbonate absorption and, cortical thick ascending limb, F821

- chloride secretion and, proximal tubules (shark), F282
- diuresis, loop segment chloride uptake during, prostaglandin inhibitor effects, F698
- prolonged treatment, distal convoluted tubule, F374
- water and sodium transport, urinary bladder (toad), F594

G

Gallbladder

- epithelial cell volume regulation, calcium and cytoskeleton involvement (frog), C27
- epithelium, propionate and bicarbonate effects (mudpuppy), C58
- Gamma globulin, rose bengal transport and, hepatic, G702

Ganglia

- intrapancratic, periodic insular secretions and, E522
- superior cervical, cephalic carotid pressure, H867

Gap junction: *see* Junctions

Gardos effect, potassium efflux, iodoacetic acid inhibition, erythrocytes, C419

Gas, exchange, cross-current, carbon dioxide sources in air sacs (penguin), R748

Gastric acid

- formation, permeable gastric glands, G561
- microcirculation and, gastric mucosa, G741
- secretion, somatostatin effects, G337

Gastric antrum: *see* Antrum

Gastric cells

- acid secretory response, tricyclic antidepressants and, G360
- surface, function, G142

Gastric emptying

- determination, calories, osmolality and calcium effects, R479
- fat, oral stimulation and, R459
- milk, pup, R732

Gastric fistula, sham feeding, R387

Gastric glands

- lipase secretion, G68
- permeable, acid formation, prestimulation and, G561

Gastric hormones

- regulation, pirenzepine-sensitive muscarinic receptors, G184
- release, vagal regulation of, E425

Gastric motility: *see* Motility

Gastric mucosa

- acid secretion, electroneutral (frog), G246
- adaptation to chronic restraint, vagotomy effects, G35
- arachidonate actions, microcirculation, G580

barrier

- hydrophobicity, G643
- potential difference and, G142
- blood flow, autoradiography, G539
- damage, sulfodeoxycholate effects, G485
- ethanol effects, sodium transport, G299
- histamine, pentagastrin effects, G369
- microcirculation: *see* Microcirculation
- silver effects (bullfrog), G443
- somatostatin release, cholecystokinin and, G569
- sudden potential drop (bullfrog), G587

SUBJECT INDEX TO VOLUME 348

- Gastric tone, physiological variations, electronic barostat, G229
- Gastrin
alkaline secretion and, gastroduodenal, G687
histamine, gastric mucosal, G369
regulation, pirenzepine-sensitive muscarinic receptors, G184
release, divalent cation effects, G28
secretion
neurally mediated, bombesin antiserum effects, G456
response to sham feeding, G188
vagal regulation of, E425
somatostatin release, fundic mucosal cells, G569
trophic effects, gastroduodenal mucosa and pancreas, G170
- Gastrocnemius muscle, α -aminoisobutyric acid transport, after exercise, E546
- Gastroduodenal mucosa, growth, trophic effects of prostaglandins, G170
- Gastrointestinal hormones
meal size and composition effects, E101
satiety and, obesity, G277
secretion, divalent cation effects, G28
- Gastrointestinal tract
interdigestive migrating contractions in, macrolide antibiotics, G320
oxygen uptake, hematocrit effects, neonate (lamb), G432
- Gentamicin, nephrotoxicity, protective effect of thyroxine, F332
- Geometry, cell and bundle appositions, cardiac muscle, H792
- Glibenclamide, sodium-potassium-ATPase activity and, pancreatic islets, E491
- Glomerular filtration: see Filtration
- Glomerulosa cells
responsiveness, prolonged stimulation with angiotensin II, E209
steroid secretion, calcium in, E89
- Glomerulotubular balance
bicarbonate absorption, F272
bicarbonate and water reabsorption, early proximal tubule, F113
- Glucagon
body temperature and, lethal and non-lethal doses of endotoxin, R471
hypoglycemia and lactic acidosis, endotoxin shock (sheep), E309
lactate metabolism and, hepatic, awake state, E463
lipid-induced hyperemia and, G208
pancreatic, renal hemodynamics and, F656
plasma epinephrine, fasting and exercise, R302
portal hypertension, reduced vascular sensitivity to norepinephrine, G192
postexercise ketosis, fasted endurance training, R63
pulsatile stimuli, hepatocyte response, model, E681
response to glucose infusion, lactation (dairy cow), E108
sympathetic nervous system activity and, sepsis, E236
- Glucocorticoids
compensatory adrenal growth and, E450
hexose transport inhibition, adipocytes, E215
sodium-hydrogen exchange activation, renal brush-border vesicles, F233
sodium-potassium-ATPase and, nephron segments, F487
treatment, excitation-contraction coupling and, E363
- Glucocorticosteroids, postpneumectomy lung growth, adrenalectomy effects, E70
- Gluconate, potassium transport and, distal tubules, F638
- Gluconeogenesis
determination of, ^{14}C -labeled substrates and, R391
diabetes effects, liver plasma membrane vesicles, E581
hepatic lactate metabolism and, awake state, E463
lactation and (dairy cow), E108
phosphorylase kinase deficiency, liver, E44
plasma epinephrine, fasting and exercise, R302
- Glucose
blood
fasting and exercise, R302
gastric sham feeding, R387
insulin dose-response curves, E353
blood homeostasis, liver phosphorylase kinase deficiency, E44
cerebral use, measured with ^{14}C -labeled glucose, C170
control, secretion vesicle margination and lysis, E375
decreased utilization, cardiomyopathy in diabetes, H179
disposal, thyroid hormone effects, E593
free fatty acid kinetics and, sepsis, E236
gastric emptying and, R479
gastrin-releasing peptide, food intake and (baboon), R578
hyperemia, intestinal, hyperosmolality and, G521
infusion
glucagon, insulin, and growth hormone responses (dairy cow), E108
sepsis effects, very-low density lipoprotein, E732
insulin binding, exercise effects, muscle, E403
insulin release, exocytotic, E375
intestinal mucosal hyperemia and, laser-Doppler blood flowmetry and, G393
kinetics
insulin modulation, indomethacin and salicylate effects, E648
lethal and nonlethal doses of endotoxin, R471
lung lipids and, ozone exposure, E553
metabolism
blood, insulin action, muscle, E567
brain, satiety level and, R447
muscle, exercise, E575
obesity, brain lesions, R46
oral, tolerance, genetic obesity and, E500
plasma, nonirritative lesions of ventromedial hypothalamus, E669
space, renal membrane vesicles, F574
transport
cerebral, fetal (lamb), R72
hepatopancreatic brush-border membrane vesicles (lobster), R133
intestinal epithelia (flounder), R573
turnover, insulin-induced hypoglycemia, liver denervation and, E327
uptake
catecholamine effects, skeletal muscle, C406
during and after exercise, nonexercising muscle, E540
muscle, after exercise, E546
- D-Glucose
transport, renal brush-border vesicles, F212
uptake, maturation of, jejunal brush-border membrane vesicles, G87
- Glucose carbon, incorporation into lung lipids, ozone exposure and, E553
- Glucose-6-phosphate dehydrogenase, lipogenic enzyme activity, hepatocytes, E719
- L-Glutamate, transport, renal outer cortical brush-border membrane, F869
- Glutamate deaminase, maleate-induced stimulation, kidney, F585
- Glutamic acid, regulation, skeletal muscle cells, C442
- Glutaminase, production, skeletal muscle cells, C442
- Glutamine
malnourishment and, during parenteral nutrition, E409
metabolism
maleate-induced, kidney, F585
renal ammoniogenesis and, F607
production, skeletal muscle cells, C442
- γ -Glutamyltransferase, excretion, post-ischemic, kidney, F804
- Glutathione, secretion into bile, sulfo-bromophthalein inhibition, G238
- Glyburide
control, secretion vesicle margination and lysis, E375
electrical activity and, B cells, C527
- Glycerol, output, cardiac myocytes, H208
- Glycocalyx, endotoxin effects, adipocytes, R331
- Glycogen
insulin-induced hypoglycemia, liver denervation and, E327
metabolism, enzymes and metabolites of, cardiac Purkinje fibers, H599
mitochondria and myofibrils, trained spontaneous hypertension, H8
muscle, exercise and, E575
synthesis, insulin effects, skeletal muscle, E148
- Glycogenolysis
catecholamine effects, skeletal muscle, C406
during and after exercise, nonexercising muscle, E540
hepatic lactate metabolism and, awake state, E463
muscle
heavy exercise, hindquarter, C109
heavy exercise and, C337
- Glycogen phosphorylase
cAMP-independent stimulation of, hepatocytes, newborn, E560
cardiac, ischemia, H350
- Glycolysis
lactate production, nephron, F522
rest-work transition, energy sources in, H922
- Glycolytic enzymes, biochemical characterization, renal epithelial cells, F536
- Glycolytic flux, cardiac, diabetes and, E602
- Glycoprotein
colonic, secretion, G54
mucus, intestinal, malnourishment and, G418
- Glycyl-L-proline, transport, intestinal brush-border membrane vesicles, G682

Gonadotropin, hormonal pulse detection, false-positive errors, E475
 Gonadotropin-releasing hormone pituitary, monosodium glutamate effects, E126
 receptor: see Receptors
 Gracilis muscle, rest-work transition, energy sources in, H922
 Granular cells, acidification and, bladder (turtle), R584
 Granule
 secretion, permeability to protein, G385
 secretion margination, control by glucose, IBMX, and glyburide, E375
 Growth factors, oncogenes, ions, and phospholipids, C3
 Growth hormone
 lipogenic enzymes activity and, hepatocytes, E719
 release, growth hormone-releasing factor and, anterior pituitary cells, E438
 response to glucose infusion, lactation (dairy cow), E108
 secretion, dihydropyridine inhibition of, pituitary cells, C510
 Growth hormone-releasing factor, growth hormone and arachidonate release and, anterior pituitary cells, E438
 Growth: see also Development; Maturation
 fetal (guinea pig), E132
 heart, postnatal hypothyroidism and, E381
 lung, prior adrenalectomy effects, E70
 pancreatic, blood flow relations, G61
 propylthiouracil dosage effects, R524
 unilateral pneumonectomy, lung growth in response to, E162
 Guanethidine, adrenal cortical growth, sympathectomy effects, E261
 Guanine nucleotide, developmental changes, liver, E712
 Guanosine diphosphate
 binding, brown fat, cold exposure, C365
 fatty acyl-CoA ester effects, brown fat mitochondria (hamster), E699
 Guanosine monophosphate, cyclic injection, calcium slow channels and, heart cells, H745
 muscarinic stimulation, pepsinogen secretion (frog), G79
 Gustatory response, digestion and, intragastric oil meals, R459
 Gut hormones: see Intestinal hormones
 Gut: see Intestine

H

Halothane, anesthesia, autonomic modulation of refractoriness, R515
 Heart
 automatic and conductile tissues, selective parasympathectomy, H61
 automaticity, adenosine effects, H907
 biochemical development, postnatal hypothyroidism and, E381
 contractile abnormalities, noninsulin-dependent diabetes and, H179
 diabetic
 enhanced adrenergic sensitivity, neonate (lamb), H125
 methyl palmoxirate and myosin iso-enzyme effects, E602
 excitation spread, anatomy of, light microscopy, H792
 exercise, muscle glucose metabolism and, E575
 failure, plasma vasopressin response in, H396
 function, erythrocyte storage and oxy-hemoglobin affinity change effects, H508
 genetic obesity effects, H438
 hypertrophy: see Hypertrophy
 innervation, autonomic modulation of refractoriness, R515
 lymph enzymes, ischemia, H350
 membrane, adenylate cyclase, adenosine effects, H737
 performance, plasma catecholamines and, awake state, H82
 plasma membrane, freeze-fractured, internal structure, H297
 pressure-overloaded, isomyosin and thyroid hormone levels, weanling and adult, H305
 prostaglandins and thromboxane, myocardial ischemia, H493
 protein degradation, redox potential and, E726
 sinus node and AV junction, alinidine effects, H324
 sodium-potassium-ATPase, comparison (guinea pig), C247
 sympathoadrenal activity, hypothalamic obesity and, E607
 thyroxine-induced hypertrophy, faster protein and ribosome synthesis, C309
 ultrastructure, gap junctions, H783
 Heart atria
 acetylcholine release, presynaptic modulation of, H33
 natriuretic, bioassay, F314
 natriuretic factor
 glomerular filtration rate and, F24
 renal response, awake state, R495
 plasma membrane, freeze-fractured, H297
 pressure: see Pressure
 Heart cells: see also Cardiac cells;
 Myocytes
 apamin effects, H961
 calcium slow channels, guanosine monophosphate, cyclic effects, H745
 Heart disease, diabetes and, E170
 Heart rate
 analysis, autonomic function and, H151
 bombesin effects, H425
 control, skeletal muscle contraction, H678, H688
 functional sympathetic control, neonate, R601
 intracerebroventricular vasopressin effects (monkey), R674
 left atrial receptors, interaction with carotid sinus baroreceptors, H631
 pentobarbital effects, plasma catecholamines, E95
 reflex bradycardia, anterior hypothalamic lesions and, H937
 stimulation, muscle and cutaneous afferents, R426
 vagotomy and, exocrine pancreatic secretion, G532
 Heart ventricles
 anteroventral third, corticosterone regulation, R161
 automaticity, adenosine effects, H907
 cells, transient depolarizations, phenothiazine suppression of, H291
 conduction system, autonomic modulation of refractoriness, R515

contractility, physiological beating effects, H894
 defibrillation, β -adrenergic modulation of, anesthesia, H674
 efferent vagal innervation, H89
 plasma membrane, freeze-fractured, H297
 pressure-volume relations, reduced resistive afterload effects, H163
 stroke volume, arterial input impedance and, H477
 Heart ventricles, left
 drainage, two-hour circulatory arrest, hypothermia and, survival after, R308
 failure, myocardial infarction and, H876, H883
 function, hemorrhagic shock, newborn, R724
 genetic obesity and, H438
 hypertrophy: see Hypertrophy
 loading conditions and inotropic state effects, rapid filling phase, H523
 outflow, aortic bulb-aortic orifice hemodynamics, H132
 plasma catecholamine level effects, awake state, H82
 wall stiffness, ischemia and, H719
 Heat
 exchange, nasal, central control of (reindeer), R679
 production
 energy regulation and (hamster), R439
 feeding and, E75
 pH and energetics, rectococcygeus muscle, C357
 Hematocrit
 microvessel, fluorescent erythrocytes, measurements, H577
 oxygen uptake and, intestines, neonate (lamb), G432
 Hemerythrin, oxygen transport, invertebrates, R505
 Hemocyanin, oxygen transport, invertebrates, R505
 Hemodilution, profound, two-hour circulatory arrest, hypothermia and, R308
 Hemodynamic stimulus, flow restriction, growth of arterial diameter and, H540
 Hemoglobin, oxygen transport, invertebrates, R505
 Hemorrhage
 central angiotensin during, R363
 graded, vasopressinergic neuron function, E155
 subarachnoid, cerebral and hindlimb vessels, H232
 Hemorrhagic shock: see Shock
 Henle's loop
 ammonia transport, F459
 bicarbonate absorption, sodium-dependent, F821
 phosphate reabsorption, superficial and deep nephrons, F729
 potassium depletion, chloride transport and, F682
 reduced dietary protein and, F31
 thick ascending limb, direct visualization, macula densa, F890
 Hepatectomy
 partial
 somatomedin C and, E618
 ureagenesis and carbamoyl-phosphate synthetase I activity in, G501

SUBJECT INDEX TO VOLUME 248

- Hepatic artery**
adenosine effects, H331
controlled ventilation effects, nicotine, blood flow and, H360
oxygen consumption, chronic ethanol feeding effects, G507
- Hepatocytes**
glycogen phosphorylase, cAMP-independent stimulation of, newborn, E560
lipogenic enzyme activity, growth hormone effects, E719
plasma membrane role, insulin degradation, E194
response, pulsatile glucagon stimuli, model, E681
transferrin and iron release, G93
vasoactive intestinal peptides, preferential binding of, G663
- Hepatopancreas, brush-border membrane vesicles, glucose transport (lobster), R133**
- Heterogeneity, intercalated cell, lectin binding, kidney collecting ducts, C348**
- Heterozygote effect, insulin release, pancreatic, E188**
- Hexokinase, activity, isoproterenol effects, adipocytes, E706**
- Hexose**
transport, inhibition by dexamethasone, adipocytes, E215
uptake, long-term regulation of, isoproterenol, E706
- Heymann nephritis: see Nephritis**
- Hindlimb, capillary filtration coefficient, dextran and, H452**
- Hindlimb vessels, vasomotor response, hormonal norepinephrine, H232**
- His-Purkinje system, refractoriness in, autonomic modulation, R515**
- Histamine**
gastric mucosal, pentagastrin effects, G369
mediation, endothelial and vascular smooth muscle cell movement, C252
- Histamine antagonist, corticosterone secretion, endotoxin-induced, E26**
- Histidine, net release, kidney, E51**
- Hormonal pulse, detection, false-positive errors in, E475**
- Hormonal regulation**
gap junctions, myometrium, C296
sodium-hydrogen exchange, renal brush-border vesicles, F233
- Hormonal response**
metabolic, meal size and composition effects, E101
renal tubular epithelia, F436
- Hormones: see also specific hormone action, liver, C203**
levels, pancreatic acini, C535
secretion, dihydropyridine inhibition of, pituitary cells, C510
- Horse radish peroxidase**
cell geometry and innervation, stellate ganglion, R288
kidney cortex, ATP-dependent hydrogen pump in, F835
- Hyaluronic acid, pH changes, colloid osmotic pressure and, H890**
- Hybridoma, culture, immunodissection, F1**
- Hydrocephalus, vasopressin, dehydration, postural changes, and nausea, R78**
- Hydrochlorothiazide, sodium chloride intake and, R1**
- Hydrocortisone, postpneumectomy lung growth, adrenalectomy effects, E70**
- Hydrogen**
gastric secretion, response to sham feeding, G188
transport, papillary collecting duct, C241
- Hydrogen chloride, secretion, ion transport studies with hydrogen-potassium-ATPase-rich vesicles, G595**
- Hydrogen gas, clearance, somatostatin effects, G337**
- Hydrogen ions**
movement, membrane vesicles, smooth muscle, C372
secretion
ammonia transport and, bladder (turtle), F720
inhibition by lectins, bladder (turtle), R584
omeprazole inhibition, jejunum (frog), G256
transport, electroneutral, gastric mucosa (frog), G246
- Hydrogen peroxide**
arteriolar metabolism and, H534
cerebral arterioles and, H157
- Hydrogen-potassium-ATPase, vesicles, ion transport studies with, G595**
- Hydrogen-potassium exchange, omeprazole inhibition of, jejunum (frog), G256**
- Hydrogen pump: see Pump**
- Hydropenia, bicarbonate and water reabsorption, early proximal tubule, F113**
- 15-Hydroperoxy-eicosatetraenoic acid, oxygen consumption, cerebral arteriolar, H534**
- Hydrophobicity, stretched stomach lining, G643**
- 6-Hydroxydopamine, adrenal cortical growth, sympathectomy effects, E261**
- Hydroxyl radical, cerebral arterioles and, H157**
- 5-Hydroxytryptamine**
relaxation, platelets, H389
serotonin binding, lung, E58
- Hyperaldosteronism, chloride conservation, renal, potassium depletion and, F104**
- Hyperalimentation, intragastric, ventromedial hypothalamic lesions and, R172**
- Hyperammonemia, cerebral blood flow during, H500**
- Hypercapnia, cerebral blood flow, oxygen consumption and, H500**
- Hyperdipsia**
nucleus medianus lesions and, R214
spontaneous hypertension, disordered drinking and, R464
- Hyperemia**
intestinal
glucose-induced, hyperosmolality and, G521
vascular sensitivity to norepinephrine, G192
intestinal mucosal, glucose and bile induced, laser-Doppler blood flowmetry, G393
lipid-induced, gut hormones and, G208
reactive, myocardial, intracoronary adenosine enhancement, H812
- Hyperinsulinemia, pancreatic insulin release, heterozygote effect, E188**
- Hyperosmolality, intestinal hyperemia, glucose-induced, G521**
- Hyperplasia**
lung growth, after unilateral pneumonectomy, E162
prostaglandins and, gastroduodenal mucosa and pancreas, G170
- Hyperreactivity, nonirritative lesions, ventromedial hypothalamus, E669**
- Hypertension**
acute, permeability of blood-brain barrier, H712
arterial, Cushing response, H98
arterial transmural transport, mathematical model, H240
genetic, norepinephrine-induced phasic activity, tail artery, H419
Goldblatt, renin isoelectric heterogeneity in, E694
oral contraceptive, renin-angiotensin mechanisms in, awake state, H695
portal
mechanisms in maintenance, model, G618
reduced vascular sensitivity to norepinephrine, G192
pulmonary, alveolar inflammation and arachidonate metabolism in, H859
renal, pressure-natriuresis, F190
spontaneous
abnormal pressure-diuresis-natriuresis response, F199
disordered drinking and, R464
erythrocytic antihypertensive substance, H445
glomerular responses to verapamil and, F668
kallikrein excretion in, F396
mitochondria and myofibrils, exercise training and, H8
neuronal cultures, norepinephrine uptake, brain, C488
vasopressin in, pressor activity, H49
vessel wall role, acute baroreceptor resetting, H843
- Hyperthermia, melanocyte-stimulating hormone, corticotropin-releasing factor and, central, R125**
- Hyperthyroidism, insulin action and, E593**
- Hypertrophy**
cardiac, isomyosin and thyroid hormone levels, weanling and adult, H305
compensatory adrenal, mineralocorticoid and glucocorticoid effects, E450
heart
chronic norepinephrine infusion and adrenergic function, H485
genetic obesity effects, H438
left ventricular, exercise training, spontaneous hypertension and, H8
lung growth, after unilateral pneumonectomy, E162
postpneumectomy lung growth, adrenalectomy effects, E70
prostaglandins and, gastroduodenal mucosa and pancreas, G170
thyroxine-induced, faster protein and ribosome synthesis, heart, C309
- Hypervolemia**
exercise training-induced, water uptake and renal mechanisms in (greyhound), R422
two-hour circulatory arrest, survival after, R308
- Hypoaactivity, energy deficit and (hamster), R439**
- Hypocapnia, cerebral blood flow, oxygen consumption and, H500**

Hypoglycemia
 insulin
 cerebral metabolism and, fetal (lamb), R72
 glucose turnover during, liver denervation and, E327
 lactic acidosis and, endotoxemic shock (sheep), E309
 plasma epinephrine, fasting and exercise and, R302
 Hyponatremia, severe, rapid correction, brain changes and, F711
 Hypophysectomy, reproductive tract fluids, androgens in, male, E274
 Hypotension
 gastrointestinal blood flow, autoradiography, G539
 renin-angiotensin system, drinking behavior and (flounder), R157
 vessel wall role, acute baroreceptor resetting, H843
 Hypothalamic lesions, ventromedial, brown adipose tissue after, E20
 Hypothalamo-hypophyseal-interrenal system, activation, urophysiology (goldfish), R197
 Hypothalamus
 anterior, lesions, reflex bradycardia and, H937
 metabolism, satiety and, R447, R453
 paraventricular nucleus
 amygdala, R38
 neural projections from, R271
 thermal stimulation, deoxyglucose incorporation, R84
 ventromedial
 lesions, altered insulin and glucose, obesity, R46
 lesions, intragastric hyperalimination and, R172
 nonirritative lesions of, E669
 Hypothermia, circulatory arrest, survival after, R308
 Hypothyroidism
 glycogen phosphorylase, hepatocytes, newborn, E560
 postnatal, compensatory cell proliferation and growth after, E381
 propylthiouracil dosage effects, serum thyroxine, growth and weaning, R524
 Hypoxia
 activation-inactivation dynamics, papillary muscle, R54
 energy metabolism, contracting skeletal muscle, H40
 energy sources, aerobic rest-work transitions, H922
 intestinal capillary permeability and, G272
 myocardial dysfunction and, endotoxemic shock, H818
 oxygen transport, regional blood flow and (sheep), H118
 temperature regulation and (lizard), R595
 vasoconstriction, sodium-potassium-ATPase and, lung, H55
 Hysterectomy, prolactin surges and, E269

I

Ileum
 mucosal hyperemia, laser-Doppler blood flowmetry and, G393
 salt and fluid absorption, amiloride-sensitive, G133

sodium and chloride transport, calmodulin in calcium ion regulation, G726
 Immersion, cold and, urinary responses to, R560
 Immunocytology, polypeptide families, erythrocyte membranes, C70
 Immunodetection, sodium-potassium-ATPase, heart, brain, kidney (guinea pig), C247
 Immunodissection, monoclonal antibodies, renal cell isolation, F1
 Immunofluorescence, lectin binding, kidney collecting ducts, C348
 Immunoglobulin G, immunodissection, renal cells, F1
 Impedance
 arterial input, stroke volume effects and, H477
 coronary, pressure and tone dependence, H700
 IMP: see Inosine monophosphate
 Indicator-dilution studies
 hepatic vein, H186
 hypoxia effects, intestinal capillary permeability, G272
 plasma and urinary adenosine, kidney, F545
 Indomethacin
 blood pressure and vascular reactivity, phosphate depletion effects, F93
 cardiac output and, fetal (lamb), H853
 lung water, pulmonary hemodynamics and, H225
 potassium and chloride and, Henle's loop, F682
 pressure natriuresis, renal, F8
 prostaglandin effects, dopamine actions, pancreas, G110
 pulmonary hypertension, alveolar inflammation and arachidonate metabolism, H859
 release, endotoxin effects, E420
 salicylate and, insulin modulation on glucose kinetics, E648
 sodium transport, ethanol effects, gastric mucosa, G299
 Infant: see Neonate; Newborn
 Infarction
 myocardial
 left ventricular failure induced by, H876, H883
 refractoriness of extrastimuli and, H606
 Information matrix, ferrokinetics, R378
 Ingestion: see Feeding
 Innervation
 automatic and conductile tissues, heart, H61
 vasoconstrictor, circulatory effects (swine), H69
 Inorganic phosphate: see Phosphate
 Inosine, myocardial ischemia and, H644
 Inosine monophosphate
 accumulation, aerobic metabolism effects, fast-twitch muscle, C37
 acidosis effects, contracting fast-twitch muscle, C43
 Inositol trisphosphate, intracellular second messengers, liver, C203
 Inotropic state, loading conditions, rapid filling phase of left ventricle, H523
 Insulin
 action
 heterogeneity, individual muscles, E567
 hyperthyroidism effects, E593

indomethacin and salicylate effects, E648
 adrenergic sensitivity and, cardiac, neonate (lamb), H125
 albumin synthesis, messenger RNA and, E656
 amino acid transport, soleus muscle, R142
 binding, exercise effects, muscle, E403
 body fat deposition and, food intake and physical activity effects, R120
 cell-bound, processing by endothelial cells, E244
 chronic obesity, diet-induced, R717
 cycloheximide, isoproterenol effects, adipocytes, E706
 degradation, hepatocyte plasma membrane role in, E194
 degree of obesity and, E286
 endotoxemic, hypoglycemia and lactic acidosis in (sheep), E309
 energy deficit, recovery from (hamster), R439
 gastrin-releasing peptide, food intake and (baboon), R578
 hypoglycemia
 cerebral metabolism and, fetal (lamb), R72
 glucose turnover during, liver denervation and, E327
 intracellular pH and, skeletal muscle fibers (frog), C330
 meal-induced thermogenesis, palatability in, E333
 obesity, brain lesions, R46
 oscillations
 abolition by nerve blockade, pancreas, E516
 intrapancratic ganglia, periodic insulin secretions, E522
 pancreatic polypeptides and, basal plasma levels (monkey, human), R739
 plasma, nonirritative lesions of ventromedial hypothalamus and, E669
 postexercise ketosis, fasted endurance training, R63
 protein degradation, redox potential and, heart, E726
 receptors: see Receptors
 release
 control by glucose, IBMX, and glyburide, E375
 corticotropin-releasing factor and, pancreas, E741
 exocytotic, E375
 GIP-mediated, carbachol effects, pancreatic lobules, E299
 Langerhans islets, C145
 pancreatic, heterozygote effect, E188
 streptozotocin diabetes, E304
 response to glucose infusion, lactation (dairy cow), E108
 sensitivity, muscle, after exercise, E546
 steady-state turnover, metabolic clearance and, E203
 stimulation, glucose metabolism, muscle, exercise, E575
 thermogenesis and, skeletal muscle, exercise, E148
 Interdigestive migrating contractions, macrolide antibiotics, gastrointestinal tract, G320
 Interdigestive secretion, periodic, G747
 Interlobular artery, renal, acetylcholine, dopamine, and bradykinin effects, F183

SUBJECT INDEX TO VOLUME 248

Interstitium
 diffusion, macromolecule exchange, H15
 peritoneal, macromolecule exchange, H26
 Intestinal cells
 relative ion permeabilities, determination of, C399
 sugar transport, sodium ion-dependent (chick), C498
 Intestinal epithelia, glucose transport in (flounder), R573
 Intestinal hormones
 alkaline secretion and, gastroduodenal, awake state, G687
 lipid-induced hyperemia and, G208
 Intestinal mucosa, ATPase, chloride-bicarbonate-stimulated, R241
 Intestinal nerves, ion transport and, stimuli, reflexes, and responses, G261
 Intestinal villi, jejunal, acid microclimate in, G293
 Intestine, small
 brush-border membranes, iron uptake and, G376
 calcium absorption and secretion, G147
 glycyl-L-proline transport, brush-border membrane vesicles, G682
 lipid-induced hyperemia, gut hormones and, G208
 membrane lipid composition, during development, G200
 motility: *see* Motility
 protein concentration, lymph flow and, G670
 salt and fluid absorption, amiloride sensitive, G133
 sulfodeoxycholate effects, G485
 Intestines
 absorption
 calmodulin in, G726
 carnitine metabolism studies, G313
 1,25-dihydroxyvitamin D₃, G718
 blind loops, disaccharidase activity and bacterial overgrowth, G626
 brush-border membrane vesicles, glycyl-L-proline effects, G682
 capillary permeability, hypoxia effects, G272
 cobalamin uptake and release, intrinsic factor, G326
 1,25-dihydroxyvitamin D₃ action, phosphate fluxes, G40
 glucose-induced hyperemia, hyperosmolality in, G521
 insulinotropic effects, diabetes, E304
 lower, urine postrenal modification (bird), R93
 low-pH microclimate, mechanisms, G608
 maturation of, D-glucose uptake, G87
 metabolism, portal venous transport and, vitamin D₃ effects, G633
 motility: *see* Motility
 mucin depletion in, malnourishment and, G418
 oxygen uptake, hematocrit effects, neonate (lamb), G432
 peptides, food intake and (baboon), R578
 potassium and chloride secretion, cAMP and calcium effects, G103
 sugar transport, sodium ion-dependent (chick), C498
 triglycerides, endogenous and exogenous sources, G164
 zinc absorption kinetics, G46
 intrinsic factor, cobalamin, uptake and release, intestinal, G326

Inulin
 biliary protein excretion, tauroursodeoxycholate prevention of, G407
 clearance: *see* Clearance
 Iodoacetic acid, calcium-dependent potassium efflux, red blood cells, C419
 Iodoantipyrine, ¹⁴C-labeled, blood flow measurement, sciatic nerve, H311
 Ionophore A 23187
 calcium binding sites, renal membranes, F472
 calcium in, exocrine pancreas (guinea pig), G551
 prostaglandin E₂ and, mesangial cells, C119
 Ions
 movements, membrane vesicles, smooth muscle, C372
 permeabilities: *see* Permeability
 renal handling (teleost), R18
 shifts, skeletal muscle, exercise and, R190
 transport
 antral mucosa (toad), G574
 bradykinin effects, tracheal epithelium, F48
 cell proliferation and differentiation, C3
 diploid fibroblasts, C154
 intestinal nerves and, G261
 larval salt gland (shrimp), R702
 Iothalamate, glomerular filtration rate, arginine vasotocin and (duck), F663
 Iron
 deficiency, small intestinal brush-border membranes, G376
 metabolism, ferrokinetics, R378
 transferrin release and, hepatocytes, G93
 uptake, small intestine brush-border membranes, G376
 Ischemia
 brain response (gerbil), R99
 conduction failure, energy metabolism and, diabetic neuropathy, E457
 intracoronary adenosine effects, H812
 ion homeostasis and redox status, brain (turtle), R531
 lymph enzymes, cardiac, H350
 microcirculatory failure after, hepatic, H804
 muscle, IMP accumulation, aerobic metabolism effects, C37
 myocardial
 adenine pool depletion effects on recovery, H644
 glycogen metabolism and, Purkinje fibers, H599
 reduced coronary flow and prostaglandins, H493
 superoxide dismutase effects on recovery, H637
 systolic and diastolic function and, H719
 renal, function and metabolism after, F804
 vasopressin effects, coronary circulation, H516
 Isobutylmethylxanthine
 control, secretion vesicle margination and lysis, E375
 pepsinogen secretion (frog), G79
 3-Isobutyl-1-methylxanthine, electrical activity and, pancreatic β -cells, C145
 Isoelectric focusing, renin, renovascular hypertension, E694

Isomyosin, level, pressure-overloaded heart, weanling and adult, H305
 Isoproterenol
 adrenergic sensitivity, diabetic heart, neonate (lamb), H125
 regulation of hexose uptake, adipocytes, E706
 slow action potentials, apamin effects, heart muscle, H961
 stimulation of lipolysis, cardiac myocytes, H208
 Isotope
 glucose, cerebral use, C170
 prolonged infusion, amino acid label recycling, E482
 stable, sepsis, E236

J

Jejunum
 bile-oleate-induced hyperemia, G208
 brush-border membrane vesicles, D-glucose uptake, G87
 hydrogen ion secretion, omeprazole inhibition of (frog), G256
 intestinal villi, acid microclimate in, G293
 low-pH microclimate, G608
 lymph flow, protein concentration and, G670
 propulsive behavior, cholecystokinin-induced, G470
 salt and fluid absorption, amiloride-sensitive, G133
 Junction
 communicating, functional modulation of cell coupling, H765
 gap
 cardiac, protein composition and cell biology of, H783
 myometrium, hormonal control of, C296
 regulation of conductance, H753
 leaky, arterial macromolecular transport and, H945
 tight, conductance, cortical collecting duct, F858
 Juxtaglomerular cells, renin release, kinin stimulation of, F757

K

Kaliuresis, renal response, awake state, R495
 Kallidin, renin release and, glomeruli, F757
 Kallikrein
 excretion, abnormalities in, spontaneous hypertension, F396
 glandular, clearance, E664
 urinary, high potassium intake and, F382
 Kallikrein-kinin system, bradykinin effects, F87
 Ketanserin, relaxation, platelets, H389
 Keto acid dehydrogenase, branched chain, activation by exercise, R166
 α -Ketoglutarate
 metabolism, kidney, F585
 reabsorption and secretion, nephron, F404
 2-Ketoisocaproate, activation, exercise, R166
 α -Ketoisocaproate, recycling, isotope infusion, E482
 Ketone body, turnover, obesity and diabetes, R611
 Ketosis, postexercise, endurance training and fasting, R63

Kidney

acidification
in response to chronic respiratory acidosis, F492
parathyroid hormone, calcium ion, vitamin D, and inorganic phosphate effects, F739
 α -adrenoceptors: see Receptors
ammoniogenesis, regulation of, acidosis and, F607
ammonia transport, F459
arterioles, response to acetylcholine, dopamine, and bradykinin, F183
autoregulation, aminophylline or adenosine infusion, F366
baroreceptors: see Receptors
blood flow: see Blood flow
brush-border membrane vesicles: see Brush-border membrane vesicles
calcium excretion (teleost), R18
chloride conservation, dietary potassium depletion and mineralocorticoid excess effects, F104
collecting ducts, lectin binding, intercalated cells, C348
concentrating ability, potassium depletion and chloride, F682
cortex: see Kidney cortex
cortical collecting duct
cell type differentiation, F449
mineralocorticoid regulation, F858
cortical thick ascending limb, sodium-dependent bicarbonate absorption, F821
denervation, left atrial pressure and renin secretion, R641
epithelial cell cultures, biochemical characterization, F536
failure
chronic, phosphate restriction and parathyroidectomy, F175
gentamicin nephrotoxicity, thyroxine effects, F332
ischemic, mitochondrial calcium loading in, F845
plasma volume expansion and, Heymann nephritis, F247
regulation of ammoniogenesis, acidosis and, F607
function
bradykinin action and, F87
changes in, aging, R282
dietary potassium and prostaglandins, F382
glandular kallikrein and, E664
selective inhibition of thromboxane, F753
glomerulus: see Kidney glomerulus
glutamine metabolism, maleate-induced, F585
hemodynamics
atrial natriuretic factor, F24
postprandial regulation, pancreatic glucagon effects, F656
venous compression, F810
histidine and carnosine release or uptake, E51
hypertrophy, tubular ATPase activity, F565
insufficiency, protein turnover and, muscle, E337
isolated cells, comparison (guinea pig), C271
kallikrein excretion, hypertension, F396
mechanisms, exercise training-induced hypervolemia (greyhound), R422

medulla: see Kidney medulla
membranes, high-affinity calcium binding sites, F472
membrane vesicles, urate transport in, F574
microvillus membrane vesicles, water and urea transport, F650
mitochondria, calcium loading in, ischemic renal failure, F845
neural control, volume expansion and depletion, awake state, F15
nonfiltering, plasma volume expansion and, F206
ovine prolactin binding sites (toad), C80
papilla: see Kidney papilla
parathyroid hormone receptor-adenylate cyclase system, benzyl alcohol effects, E31
perfusion pressure, α - and β -adrenergic stimulation of renin release and, E317
phosphate handling, aluminum effects, F64
plasma and urinary adenosine handling, F545
postischemic, function and metabolism after, F804
postrenal modification, urine (bird), R93
potassium-adapted, potassium excretion and, F602
potassium and chloride transport, barium effects, F638
potassium recycling, aldosterone and adrenalectomy effects, F219
pressure natriuresis, prostaglandins in, F8
prostaglandin E_2 synthesis, neonatal and adult, F134
protein metabolism, C12
receptors: see Receptors
reduced dietary protein and, F31
renin angiotensin, hemorrhage and, R363
response, atrial natriuretic factor, awake state, R495
sodium-potassium-ATPase, comparison (guinea pig), C247
tissue culture, adaptation of phosphate transport, F122
tubules: see Kidney tubules
vasodilators, atriopeptins, awake state, H587
vasopressin, α_2 -adrenoceptor antagonism, F767
Kidney cells, isolation, monoclonal antibodies and, F1
Kidney cortex
membrane vesicles, ATP-dependent hydrogen pump in, F835
mitochondria, calcium transport and membrane damage in, F876
Kidney glomerulus
abnormal pressure-diuresis-natriuresis, spontaneous hypertension, F199
dynamics, colloid osmotic pressure, F444
pressure-natriuresis, model, F190
prostaglandin E_2 control, mesangial cells, C119
prostaglandin synthesis, vasoconstrictor-evoked, mesangial cells, F240
renin release, kinin stimulation of, F757
responses to verapamil, spontaneous hypertension and, F668
Kidney medulla
ammonia transport, F459

collecting duct, conductive properties of, F500
potassium recycling, aldosterone and adrenalectomy effects, F219
Kidney papilla
collecting duct
hydrogen transport, C241
potassium recycling, aldosterone and adrenalectomy effects, F219
epithelial cells, transmembrane potential of, F762
fluid uptake, vasa recta, F347
Kidney tubules
abnormal pressure-diuresis-natriuresis response, spontaneous hypertension, F199
bicarbonate absorption, sodium-dependent, F821
capacity for phosphate reabsorption, nephron, F729
collecting
cellular heterogeneity of uridine incorporation, F552
prostaglandin E_2 synthesis, neonatal and adult, F134
cortical, adenosine triphosphate and adenosine monophosphate, cyclic metabolism, F152
cortical collecting
ammonia effects, F631
cell type differentiation, F449
immunodissection, F1
distal
localization of diuretic action, F527
potassium and chloride transport, F638
potassium and sodium electrochemical profile (frog), F266
distal convoluted, adaptation to prolonged furosemide treatment, F374
dysfunction, maleic acid-induced, phosphate loading effects, F513
epithelia, growth, characterization, and hormonal response, F436
function, nephroimmunopathology, F319
pressure-natriuresis, model, F190
proximal
acidification, amiloride inhibition of, F773
ammonia transport, F459
angiotensin effects, F621
bicarbonate absorption, model, F272
brush-border membranes, bicarbonate-ATPase, F389
chloride secretion (shark), F282
chloride uptake, furosemide diuresis, F698
early, load dependence of bicarbonate and water reabsorption, F113
L-glutamate transport, F869
proton/hydroxyl permeability, F78
sodium-hydrogen exchange, hormonal regulation of, F233
water and urea transport, F650
proximal convoluted
adenosine monophosphate, cyclic, metabolism, F152
passive potassium transport, F228
sodium chloride absorption, peritubular protein effects, F790
sodium-potassium-ATPase activity, unilateral nephrectomy and sodium ion loading, F565
transport responses, angiotensin effects, F621

SUBJECT INDEX TO VOLUME 248

- vitamin D₃ binding, autoradiography, F296
- volume expansion-induced inhibitory effects, parathyroid hormone and, F100
- Kinases, cell proliferation and differentiation, C3
- Kinin, stimulation of renin release, glomeruli, F757
- Kininase, renin release and, glomeruli, F757
- L**
- Lactate
 - accumulation, aerobic rest-work transitions, H922
 - blood, fasting and exercise, R302
 - kinetics, lethal and nonlethal doses of endotoxin and, R471
 - metabolism, glucagon effects, liver, awake state, E463
 - muscle
 - heavy exercise and, hindquarter, C109
 - water and ion shifts, exercise effects, R190
 - production
 - nephron, F522
 - pH and energetics, rectococcygeus muscle, C357
 - release
 - during and after exercise, nonexercising muscle, E540
 - muscle, heavy exercise and, C337
- Lactate dehydrogenase, biliary excretion of, tauroursodeoxycholate prevention of, G407
- Lactation: *see also* Fetus; Pregnancy
 - bone mineral loss during, regulation, E182
 - glucose infusion, glucagon, insulin, and growth hormone response to (dairy cow), E108
- Lactoferrin
 - catabolism, liver, G8
 - interaction, liver, G463
- Lactoperoxidase, interaction, liver, G463
- Langerhans islets: *see* Pancreatic cells
- Lanthanide, permeability and, urinary bladder (toad), F56
- Lanthanum
 - endotoxin effects, adipocytes, R331
 - excitation-contraction coupling, cardiac, H366
 - secretion, calcium in, E89
- Lectin
 - binding, intercalated cells, kidney collecting ducts, C348
 - hydrogen ion secretion and, bladder (turtle), R584
 - lactose-specific, synthesis and binding, lung cells, C258
- Leucine
 - activation, exercise, R166
 - recycling, prolonged isotope infusion, E482
- L-Leucine, transport, intestinal epithelia (flounder), R573
- Leucomycin, interdigestive migrating contractions and, gastrointestinal tract, G320
- Leukocytes
 - distribution, microvascular bifurcations, models, H568
 - polymorphonuclear, cytoplasmic pH in neutrophils, C379
- Leukotriene C₄, gastric vasoconstrictor actions of, submucosal microcirculation in, G580
- Leukotrienes, pulmonary hypertension, monocrotaline-induced, H859
- Leydig cells, Sertoli cell interaction, E176
- Lipase, secretion, gastric glands, G68
- Lipectomy, brown fat, fat deposition and, R231
- Lipids
 - fluidity, prolactin effects, prostatic membranes, E687
 - intestinal membrane, composition and fluidity, during development, G200
 - lung, incorporation of glucose carbons, ozone exposure and, E553
 - plasma levels, regulation by plasma viscosity, E10
- Lipogenesis
 - brown adipose tissue, after ventromedial hypothalamic lesions, E20
 - splanchnic substrate balance, during parenteral nutrition, E409
- Lipogenic enzyme, activity, growth hormone effects, hepatocytes, E719
- Lipolysis, chronic obesity, diet-induced, R717
- Lipoprotein
 - plasma, plasma viscosity and, E10
 - very low-density
 - intestinal, G164
 - sepsis effects, E732
- Liposomes
 - cell coupling, functional modulation, H765
 - small intestine, G485
- Lipoxygenase
 - arachidonic acid, endothelium-dependent contractions, H432
 - bradykinin effects, tracheal epithelium, F48
 - gastric vasoconstrictor actions, submucosal microcirculation, G580
- Litorin, residual stimulation of amylase release, pancreatic acini, G196
- Liver
 - adenylate cyclase, developmental changes, E712
 - albumin-bound organic anion removal, Disse fluid effects, G709
 - arterial flow, adenosine and, H331
 - bicarbonate secretion, acid base and acetazolamide effects, G20
 - bile acid sulfotransferase, androgen and estrogen effects, G639
 - cells: *see* Hepatocytes
 - denervation, insulin-induced hypoglycemia, glucose turnover during, E327
 - developing, taurocholate transport, G648
 - endotoxemic shock, hypoglycemia and lactic acidosis (sheep), E309
 - function, glandular kallikrein and, E664
 - glycogen phosphorylase, cAMP-independent stimulation of, newborn, E560
 - human polymeric IgA uptake, G450
 - insulin sensitivity, dose-response relations, E353
 - intracellular second messenger, inositol trisphosphate and diacylglycerol, C203
 - isolated cells, comparison (guinea pig), C271
 - lactate metabolism, glucagon effects, awake state, E463
- lactoferrin catabolism, G8
- lactoferrin interaction, G463
- metabolism, malnourishment and, parenteral nutrition, E409
- microcirculatory failure, after ischemia and reperfusion, H804
- oxygen consumption, chronic ethanol feeding effects, G507
- perfusion, reflex sympathetic effects, H186
- phosphorylase kinase deficiency, blood glucose homeostasis and, E44
- plasma membrane vesicles, alanine transport, diabetes effects, E581
- prealbumin, thyroxine bound to, G545
- protein metabolism, C12
- regeneration
 - somatomedin C during, E618
 - ureagenesis, G501
- renin clearance, angiotensin blockade and, R23
- rose bengal transport, albumin and gamma globulin effects, G702
- venous compliance and unstressed volume, norepinephrine effects, H468
- LLC-PK₁ cells, phosphate-derived, phosphate transport in, F122
- LLC-PK₁₁ cells, hormonal responsiveness, regulation of, C425
- Load dependence, bicarbonate and water reabsorption, early proximal tubule, F113
- Loading
 - rapid filling phase and, left ventricle, H523
 - resistive, ventricular mechanics and, H163
- Locomotion, pattern generator, model, R484
- Locomotor activity, extraretinal photo-reception (lizard), R407
- Luminal membrane, renal, high-affinity calcium binding sites, F472
- Lung
 - development, lactose-specific lectin and, C258
 - endothelium, amine uptake, E292
 - exercise, muscle glucose metabolism and, E575
 - growth, unilateral pneumonectomy and, E162
 - hypoxic pressor reactivity, sodium-potassium-ATPase and, H55
 - inflation reflex, nicotine and, renal and splanchnic blood flow, H360
 - insulin sensitivity, dose-response relations, E353
 - lipids, glucose carbon incorporation into, ozone exposure and, E553
 - methylglyoxal bis(guanyldrazone) uptake, carrier-mediated, E292
 - postpneumonectomy growth, prior adrenalectomy effects, E70
 - serotonin binding, E58
 - water, high-dose aspirin effects, H225
- Lung cells, lactose-specific lectin, synthesis and binding, C258
- Lung lobe, left lower, high-dose aspirin effects, H225
- Luteinizing hormone
 - function, dynamic model, R312
 - hormonal pulse detection, false-positive errors, E475
 - pituitary-testicular function, food restriction effects, R181

Lymph
 cardiac, creatine kinase and phosphorylase in, H350
 1,25-dihydroxyvitamin D₂ absorption and, intestinal, G718
 intestinal, hypoxia effects, G272
Lymphatics, pericardium, elasmobranch (fish), H198
Lymphatic transport, macromolecules, peritoneal cavity and plasma, H15
Lymph fistula, mesenteric, intestinal triglycerides, G164
Lymph flow, protein concentration and, small intestine, G670
Lymphocytes
 circulating, aldosterone binding sites, E388
 regulatory response, hyposmotic media, C480
Lymphoma cells, S49, pharmacology of magnesium transport, C51
Lysis, control of, glucose, IBMX, and glyburide, E375
Lysosomal enzymes
 biochemical characterization, renal epithelial cells, F536
 processing, cardiac, C135
Lysosomes, uptake of proteins, epithelial cells, C12
Lysozyme, interaction, liver, G463

M

Macrolides, interdigestive migrating contractions in, gastrointestinal tract, G320
Macromolecules
 arterial transport, cell turnover and leaky junction effects, models, H945
 exchange, peritoneal cavity and plasma, H15
 peritoneal absorption, quantitative autoradiography, H26
Macrophages
 alveolar, inflammation, pulmonary hypertension and, H859
 lactoferrin interaction, liver, G463
 lactose-specific binding, synthesis and binding of, C258
Macula densa
 direct visualization, F890
 renin release, inhibition, plasma volume expansion and, F206
 renin suppression, prostaglandins in, acute potassium loading, F360
Magnesium
 excitation-contraction coupling, cardiac, H366
 gastrointestinal hormone release and, G28
 loading, juxtamedullary end-descending limb, F145
 transport
 diploid fibroblasts, C154
 S49 lymphoma cells, C51
Magnesium-ATPase, antrum smooth muscle, plasma membrane, C449
Maitotoxin, calcium uptake, reserpine effects, pituitary cells, E15
Maleate, glucose metabolism, kidney, F585
Maleic acid, renal tubular dysfunction, phosphate loading effects, F513
Malic enzyme
 energy regulation and (hamster), R439
 growth hormone effects, hepatocytes, E719

Malnourishment
 mucin depletion and, intestine, G418
 splanchnic substrate balance, during parenteral nutrition, E409
Malnutrition
 disaccharidase activity, intestinal blind loops, G626
 mucin depletion and, intestine, G418
Malpighian tubules, basolateral sodium conductance, dibutyl-cAMP effects, R339
Mannitol
 angiotensin, peripheral administration of, awake state, R249
 calcium transport and, cecum, G676
Maturation: see also Development; Growth
 developmental, D-glucose uptake, jejunal brush-border membrane vesicles, G87
 exercise and ovariectomy effects, bone calcium, R12
Meals: see Feeding
Meclofenamate
 lung water, pulmonary hemodynamics and, H225
 prostaglandin effects, renin suppression, acute potassium loading, F360
 relaxation, platelets, H389
 vasoconstrictor action and, renal arterioles, F779
Melanocyte-stimulating hormone
 central, fever-specific changes in, R125
 pigmentation and (hamster), R664
 γ -**Melanocyte-stimulating hormone**, adrenocorticotrophic hormone and, adrenal gland regeneration, E471
Melanotropin, central, fever-specific changes in, R125
Membrane
 plasma
 antrum smooth muscle, calcium-ATPase, C449
 cardiac, freeze-fractured, internal structure, H297
 hepatic, lactoferrin interaction, G463
 hepatocyte, insulin degradation and, E194
Membrane channels, cell biology, protein composition and, cardiac, H783
Membrane hyperpolarization, thyrotropin-induced, pituitary cells, E64
Membrane ions, conductance, outer medullary collecting duct, F500
Membrane properties, passive, ventricular myocytes, H622
6-Mercaptopurine, disposition, plasma and cerebrospinal fluid, model (monkey), R147
Mesangial cells
 prostaglandin E₂ synthesis, angiotensin and A23187, C119
 prostaglandin synthesis, vasoconstrictor-evoked, F240
Mestranol, oral contraceptive hypertension and, awake state, H695
Metabolic acidosis: see Acidosis
Metabolic clearance, cortisol, seawater adaptation and, R651
Metabolic rate
 aging and, food restriction effects, E488
 mucosal blood flow and, G393
 regulation, skeletal muscle (frog), C520
 resting
 temperature dependence, skeletal muscle, C265

thermic effects of meals, E370
 variable caloric restriction effects, R549
Metabolic regulation, energy sources, aerobic rest-work transitions, H922
Methionine sulfoximine, glutamine production, skeletal muscle cells, C442
Methiothepin, relaxation, platelets, H389
 α -**Methyl-D-glucopyranoside**, glucose transport, intestinal epithelia (flounder), R573
3-O-Methylglucose, catecholamine effects, skeletal muscle, C406
3-O-Methyl-D-glucose, transport, intestinal epithelia (flounder), R573
3-Methylhistidine, excretion, biphasic changes after exercise, E588
Methylmercury, secretion into bile, sulfobromophthalein inhibition, G238
Methyl palmoxirate, myosin isoenzymes and, diabetic heart, E602
Methylphosphonate, perfused single skins, nuclear magnetic resonance (frog), C177
Methylprednisolone, sodium transport and, colon, G124
Methylxanthines
 adenylate cyclase activity and, heart, H737
 sodium chloride intake and, R1
Metoclopramide, renal arteriolar response, F183
Metyrapone, sodium chloride intake and, R1
Microcirculation: see also Blood flow; Circulation
 gastric, regulation of capillary exchange capacity, G437
 gastric mucosal, G741
 submucosal, leukotriene C₄ in, G580
 bifurcations, blood cell distribution and, model, H568
 blood platelets, distribution of flow, arterioles, H318
 cheek pouch (hamster), H143
 hepatic failure, after ischemia and reperfusion, H804
 microvascular measurements, fluorescent erythrocytes, H577
Microclimate
 acid, intestinal villi, jejunum, G293
 low-pH, intestine, G608
Microdissection, nephron segments, F487
Microelectrodes
 antimony, intestinal villi, jejunum, G293
 ion-selective, distal tubules (frog), F266
 mineralocorticoid regulation, sodium and potassium transport, cortical collecting duct, F858
Microfluorometry, glucocorticoid effects, sodium-potassium-ATPase, nephron segments, F487
Microperfusion
 acidification, amiloride inhibition of, proximal tubules, F773
 chloride and potassium coupling of transport, distal tubules, F638
 potassium and chloride, Henle's loop, F682
 tubule, potassium transport, passive, F228
Microprobe, electron, magnesium loading, juxtamedullary nephron, F145
Micropuncture
 chloride uptake, furosemide diuresis, F698

SUBJECT INDEX TO VOLUME 248

- dome cell, colonic carcinoma, secretagogue effects, C410
- interstitial compliance, transcapillary Starling pressure and, skin and skeletal muscle, H666
- magnesium loading, juxtamedullary end-descending limb, F145
- nephron, α -ketoglutarate reabsorption, F404
- parathyroid hormone effects, glomerular filtration, F482
- phosphate reabsorption, tubular capacity for, F729

- heavy exercise, hindquarter, C109

Muscle, skeletal (*continued*)
 intracellular pH, insulin effects (frog), C330
 metabolism and performance, acidosis effects, heavy exercise, C337
 physiological stability, temperature-dependent, C265
 sarcoplasmic ionized calcium, subcontraction depolarizations (frog), C520
 transcapillary Starling pressure, interstitial compliance and, H666

Muscle, smooth
 adenosine-mediated relaxation, cytoplasmic calcium and (ferret), H109
 antrum, high-affinity calcium-ATPase, C449
 cell membrane, esophagus, electrical properties (opossum), G342
 endothelial interaction, flow restriction and arterial diameter growth, H540
 gastric, propagation, myogenic regulation of, G512
 membrane vesicles, ion movements in, C372
 metabolism, rectococcygeus muscle, C357
 phosphagens and intracellular pH, phosphorus nuclear magnetic resonance, C320
 pulmonary artery, norepinephrine uptake, H193

vascular
 aortic baroreceptor resetting, vessel wall and, H843
 cell movement, serotonin, histamine, and norepinephrine effects, C252
 cerebral arteriolar oxygen consumption by arachidonate, H534
 norepinephrine-induced phasic activity, H419
 oxygen radicals in cerebral arterioles, H157
 pregnancy-induced changes (sheep), H658

Muscle cells
 movement, serotonin, histamine, and norepinephrine effects, C252
 skeletal, regulation of glutamine production, C442
 smooth, esophagus, electrical properties (opossum), G342
 vascular smooth, extracellular calcium and sodium-potassium regulation, C436

Muscle fibers
 glucose metabolism, exercise, E575
 insulin action, heterogeneity of, E567
 myelinated, resetting of aortic baroreceptors and, H843
 skeletal, insulin effects on intracellular pH (frog), C330
 skinned, steroid myopathy, E363
 type, phosphorus nuclear magnetic resonance, C279

Muscularis mucosa, capsaicin effects (opossum), G655

Myelinolysis, central pontine, hyponatremia and, brain, F711

Myenteric plexus, motility, small intestine, G495

Mycardial cells
 biology, protein composition and, gap junctions, H783
 electrophysiology, apamin effects, H961

Myocardium
 calcium ion paradox, low sodium attenuation of, newborn, H345

contractility
 diabetes and, neonate (lamb), H125
 intracoronary acetylcholine, awake state, H930
 physiological beating effects, H894
 dysfunction, development in endotoxin shock, H818
 endogenous opiates, local action of, H382
 function, phosphate depletion effects, F93
 mechanics, diabetes effects, H729
 reoxygenation, activation-inactivation dynamics, R54

Myocytes: *see also* Cardiac cells; Heart cells
 cardiac
 amphiphile effects on sodium-potassium-ATPase, H75
 stimulation of lipolysis by isoproterenol, H208
 hypertrophy, left ventricular failure, H876
 stimulation of lipolysis, isoproterenol, H208
 ventricular
 regulation of conductance, H753
 transmembrane potassium fluxes in, H614, H622

Myoelectric activity
 migrating, prostaglandin effects, G353
 pyloric response, response to intraduodenal amino acids, G307

Myoelectric complex
 migrating
 fasting and awake state (opossum), G398
 neurotensin, G15
 small intestine, G495

Myofibrils
 cardiac, function during diabetes, E170
 growth, exercise training effects, spontaneous hypertension, H8
 myocardial infarction, left ventricular failure induced by, H883

Myoglobin, oxygen transport and, rest-work transition, H914

Myokines, acidosis effects, contracting fast-twitch muscle, C43

Myometrium
 hormonal control, gap junctions, C296
 membrane vesicles, ion movements, smooth muscle, C372

Myopathy, steroid, excitation-contraction coupling in, E363

Myosin isoenzymes, methyl palmoxirate and, diabetic heart, E602

N

Naloxone, receptor blockade, myocardium, H382

Naphthalenesulfonamides, sodium and chloride transport and, ileal, G726

Naproxen, water permeability and, urinary bladder (toad), F260

Natriuresis
 adenosine monophosphate, cyclic-induced, Malpighian tubules, R339
 atrial extracts, bioassay, F314
 cold temperature, water immersion and, R560
 pressure
 model, F190
 prostaglandins in, F8
 pressure-diuresis response, spontaneous hypertension, F199

Natriuretic factor, atrial, renal-specific vasodilators, H587

Nausea, vasopressin, cerebrospinal fluid, R78

Neonate: *see also* Newborn
 adaptation, sympathoadrenal response (sheep), E443
 calcium flux, pH-mediated, calvariae, F785
 enhanced adrenergic sensitivity, diabetic heart (lamb), H125
 myocardium, calcium ion paradox, low sodium attenuation of, H345
 oxygen uptake, hematocrit effects, intestine (lamb), G432
 prostaglandin E₂ synthesis, collecting tubules, F134
 regional blood flow, oxygen transport and, hypoxia (sheep), H118

Nephrectomy
 dopamine and angiotensin II, central effects (sheep), R541
 unilateral, sodium-potassium-ATPase activity after, tubules, F565

Nephritis
 glomerular, F319
 Heymann, edema formation and plasma volume expansion, F247

Nephroimmunopathology, pathophysiology and, F319

Nephron
 1,25-dihydroxyvitamin D₃ binding, tubular segments, autoradiography, F296
 enzymes, biochemical characterization, F536
 filtration fraction, colloid osmotic pressure, F444
 heterogeneity
 potassium recycling, aldosterone and adrenalectomy effects, F219
 Ringer fluid effects, F851
 juxtaglomerular, magnesium loading, F145
 α-ketoglutarate secretion and reabsorption, micropuncture study, F404
 obstruction, tubuloglomerular feedback after, F688
 permeability: *see* Permeability segments
 glucocorticoid effects, sodium-potassium-ATPase, F487
 growth, characterization, and hormonal response, F436
 lactate production, F522
 superficial and deep, tubular capacity for phosphate reabsorption, F729

Nephrotic syndrome, plasma lipid levels, plasma viscosity and, E10

Nephrotoxicity, gentamicin, protective effect of thyroxine, F332

Nerves: *see* specific nerve

Nerve blockade: *see* Blockade

Neural networks, pattern generator, model, R484

Neuronal activity, striatal, temperature, dopaminergic drugs and, R108

Neurons
 brain, spontaneous hypertension, norepinephrine uptake in, C488
 C₁, baroreflex and, H547
 cardiac parasympathetic, acetylcholine release, H33
 cholinergic, gastric hormone secretion and, E425
 intramural, gastrin secretion, bombesin antiserum effects, G456

vasopressinergic, function, awake and anesthetized, E155

Neuropathy, diabetic, ischemic conduction failure and energy metabolism in, E457

Neuropeptide
cardiovascular effects, central nervous system, H425
insulin release and, pancreas, E741
vasopressin rhythm, cerebrospinal fluid, E346

Neurotensin
alkaline secretion and, gastroduodenal, awake state, G687
gastrointestinal motility and, G15

Neurotransmitters, intestinal nerves, ion transport and, G261

Neutralsugar, interdigestive migrating contractions and, gastrointestinal tract, G320

Neutrophils, cytoplasmic pH, phorbol ester-induced changes in, C379

Newborn: *see also* Neonate
cardiovascular function, hemorrhagic shock, R724
heart rate, functional sympathetic control, R601
hepatocytes, glycogen phosphorylase, cAMP-independent stimulation of, E560

Nicotinamide adenine dinucleotide, lactate production, nephron, F522

Nicotine
blood flow and, renal and splanchnic, H360
³H-labeled, blood flow, sciatic nerve, H311
stimulation, protein secretion, pancreatic acini, G158

Nictitating membrane, cervical ganglion, cephalic carotid pressure, H867

Nisoldipine, aldosterone secretion and, sodium depletion (sheep), E676

Nitrendipine, vitamin D₃ and, calcium transport, cecum, G676

Nitrogen
balance, thyroxine-induced hypertrophy, heart, C309
fetal growth and (guinea pig), E132

Noise analysis, crystal accumulation and, urinary bladder, F70

Nonadrenergic nerves, smooth muscle cell membranes, esophagus (opossum), G342

Noncholinergic nerves, smooth muscle cell membranes, esophagus (opossum), G342

Nonparenchymal cells, hepatic, preferential binding of vasoactive intestinal peptides, G663

Noradrenaline: *see* Norepinephrine

Norepinephrine
 α -adrenergic phenomena and, E633
adrenergic sensitivity, diabetic heart, neonate (lamb), H125
aortic baroreceptor resetting, vessel wall and, H843
blood pressure and vascular reactivity, phosphate effects, F93
chronic infusion, hypertrophied heart, H485
chronic obesity, diet-induced, R717
efferent vagal innervation, heart ventricles, H89
efflux, renal, E317
food restriction, brown fat thermogenesis, E531

glomerular responses, spontaneous hypertension and, F668

glucose turnover, insulin-induced hypoglycemia, liver denervation and, E327

hormonal, vasomotor response to, cerebral and hindlimb vessels, H232

low-protein diet and, sympathetic nervous system, R627

meal-induced thermogenesis, palatability in, E333

mediation, endothelial and vascular smooth muscle cell movement, C252

parathyroid hormone effects, vascular reactivity, F674

phasic activity, genetic hypertension and, tail artery, H419

plasma levels, cardiac performance and, awake state, H82

portal vein levels, reflex sympathetic effects, H186

renal arteriolar response, F183

spillover, blood pressure and, during propranolol infusion, R400

sympathoadrenal response, neonatal adaptation (sheep), E443

turnover, hypothalamic obesity, brown fat, E607

uptake, altered, neurons, spontaneous hypertension, brain, C488

uptake and metabolism, pulmonary artery endothelium, H193

vascular sensitivity to, portal hypertension, G192

vasoconstrictor action and, renal arterioles, F779

norepinephrine and angiotensin II phosphate depletion effects, F93

vasoconstrictor agonists, parathyroid hormone effects, F674

Norethynodrel, oral contraceptive hypertension and, awake state, H695

Nuclear magnetic resonance
perfused single skins (frog), C177
phosphorus
chemical changes, leg muscle, C542
fast- and slow-twitch muscle, C279
oxygen dependence, contracting skeletal muscle, H40
smooth muscle, C320

5'-Nucleotidase, biliary excretion of, taurosoxocholate prevention of, G407

Nucleus medianus
lesions
drinking responses after, R224
hyperdipsia and, R214

Nucleus raphe dorsalis, stimulation, carotid blood flow and (monkey), R257, R263

Nutrients
absorption, meal size and composition effects, E101
intraduodenal, cholecystokinin effects, G347
transport, jejunal brush-border membrane vesicles, G87

O

Obesity
altered insulin and glucose, brain lesions, R46
cafeteria diet, brown fat and (hamster), E230
cAMP metabolism and lipolysis, cafeteria diet and, brown adipocytes (hamster), E224

degree of, insulin relations, E286

diabetes and, ketone body turnover, R611

diet-induced, brown adipose and metabolic features of, R717

fatty acid reesterification, adipose tissue, E140

food restriction, brown fat thermogenesis and, E531

genetic
abnormal glucose tolerance and, E500
left ventricular function and, H438

hypothalamic, brown adipose tissue and sympathoadrenal activity, E607

insulin release, pancreatic, E188

lipectomy, brown adipose tissue, R231

nonirritative lesions, ventromedial hypothalamus, E669

satiety in, pancreatic polypeptides, caerulein, and bombesin effects, G277

ventromedial hypothalamic lesions and, R172

Oleandomycin, interdigestive migrating contractions and, gastrointestinal tract, G320

Oligomycin, brush-border membranes, proximal tubules, F389

Omeprazole
acid formation, permeable gastric glands, G561
hydrogen ion secretion and, jejunum (frog), G256
secretion, electroneutral, gastric mucosa (frog), G246

Ontogeny, sodium excretion, renal α -adrenoceptors and, F128

Oophorectomy, bone mineral loss, during lactation, E182

Opiates
endogenous, local action of, myocardium, H382
pyloric, intraduodenal amino acid reflexes, G307

Oral contraceptives, hypertension, renin-angiotensin mechanisms in, awake state, H695

Oral stimulation, digestion and, intragastric oil meals, R459

Ornithine, ureagenesis and, regenerating liver, G501

Orotic acid, ureagenesis and, regenerating liver, G501

Oscillations, spontaneous, cardiac cells, H412

Osmolality
cell, passage through narrow pores, C473
gastric emptying and, R479
plasma
angiotensin and, awake state, R249
rehydration and (sheep), R68
vasopressin, dehydration, R78
volume expansion and rectal gland stimulation (dogfish), R638
transmembrane potential, papillary epithelial cells, F762
vasopressin release, endotoxin effects, E420
vasopressin secretion and, pregnancy, R29

Osmoregulation
cortisol dynamics, seawater adaptation and (salmon), R651
plasma vasopressin, cerebrospinal fluid, E346
vasopressin release and, R645

Osmoregulation (*continued*)
 vasopressin secretion and, pregnancy, R29
 Osmotic regulation, plasma vasopressin response, heart failure, H396
 Ouabain
 binding, cell density, tracheal mucosa, C389
 brush-border membranes, proximal tubules, F389
 glucose transport and, intestinal epithelia (flounder), R573
 hydrogen transport and, papillary collecting duct, kidney, C241
 hypoxic pressor reactivity and, lung, H55
 ion transport, diploid fibroblasts, C154
 potassium fluxes, myocytes, H614
 sodium-potassium-ATPase activity and, pancreatic islets, E491
 transport, ammonia effects, cortical collecting tubule, F631
 Ovariectomy, exercise and, bone calcium, R12
 Oviduct
 function, vascular perfusion, E624
 prostaglandin E₂ binding (hen), E80
 Ovulation, vascular perfusion, E624
 Oxidation
 fatty acids, satiety level and, R447, R453
 sepsis effects, very-low-density lipoprotein, E732
 Oxidation-reduction state, NADH, brain ischemia (gerbil), R99
 Oxidative phosphorylation, acid formation, permeable gastric glands, G561
 Oxonic acid, transport, renal membrane vesicles, F574
 Oxygen
 carriers, testicular steroid secretion, E432
 consumption
 cerebral arteriolar, arachidonate and, H534
 cerebral blood flow and, hyperammonemia, H500
 diet-induced chronic obesity, R717
 ephedrine-induced thermogenesis, E507
 heavy exercise and, muscle, C109
 hepatic, chronic ethanol feeding and, G507
 insulin effects, skeletal muscle, E148
 intracerebroventricular vasopressin effects (monkey), R674
 myocardial, aminophylline effects, H1
 myocardial, erythrocyte storage and oxyhemoglobin affinity effects, H508
 myocardial, local endogenous opiate activity, H382
 pH and energetics, rectococcygeus muscle, C357
 pH change effects, pancreas, C235
 postischemic, kidney, F804
 deficit, aerobic rest-work transitions, H922
 dependence, contracting skeletal muscle, H40
 myocardial usage, diabetes and, neonate (lamb), H125
 sensing, sodium-potassium-ATPase and hypoxic vasoconstriction, H55
 transport
 invertebrates, R505
 regional blood flow and, during hypoxia (sheep), H118

rest-work transition, myoglobin and, H914
 uptake
 acidosis effects, heavy exercise, C337
 hematocrit effects, intestine, neonate (lamb), G432
 intestinal mucosal hyperemia, G393
 Oxygenation, hematocrit effects, intestines, neonate (lamb), G432
 Oxygen radicals, cerebral arterioles and, H157
 Oxyhemoglobin, affinity change, cardiac function and, H508
 Oxyntic cells, stimulation, hydrogen chloride secretion, hydrogen-potassium-ATPase-rich vesicles, G595
 Oxypurines, myocardial ischemia and, H644
 Ozone, exposure, glucose carbon incorporation into lung lipids, E553

P

Pacemaker, ventricular, adenosine effects, H907
 Pacing, coronary functional hyperemia, aminophylline effects, H1
 Palmitate, sepsis effects, very-low-density lipoprotein, E732
 Palmitoyl carnitine, inhibition of sodium-potassium-ATPase, sarcolemmal, H75
 Palmitoyl coenzyme A, brown fat mitochondria (hamster), E699
 Pancreas
 calcium-dependent secretory and redox response, cholecystokinin octapeptide-8, C228
 corticotropin-releasing factor, insulin release and, E741
 dopamine action, prostaglandin effects, G110
 exocrine
 cholecystokinin-stimulated phosphoinositide breakdown, calcium in (guinea pig), G551
 gastrin-releasing peptides and (pig), G281
 response to amino acids and fat, cholecystokinin effects, G347
 secretion, divalent cation effects, G28
 secretion, vagotomy and atropine effects, G532
 ganglia, periodic insular secretions, E522
 glucose infusion effects, lactation (dairy cow), E108
 growth
 blood flow relations, G61
 trophic effects of prostaglandins, G170
 insulin oscillations, abolition by nerve blockade, E516
 insulinotropic effects, diabetes, E304
 insulin release, heterozygote effect, E188
 lobules, GIP-mediated insulin release, carbachol effects, E299
 pH change effects, redox state and CCK-induced secretion, C235
 polypeptide levels, fluctuations (monkey, human), R739
 protein kinase in, G692
 secretion, nicotine stimulation of, G158
 zymogen granule membrane, permeability to protein, G385
 Pancreatic acinar cells
 protein kinase in, G692

zymogen granule membrane, permeability to protein, G385
 Pancreatic acini
 intracellular calcium levels, amylase secretion and, C535
 N-terminal fragments of cholecystokinin (guinea pig), G98
 protein secretion, nicotine stimulation of, G158
 residual stimulation of amylase, bombesin-induced, G196
 Pancreatic β -cells
 abnormal oral glucose tolerance, genetic obesity, E500
 electrical activity, adenosine monophosphate, cyclic and insulin release, C145
 sodium-potassium-ATPase activity, hypoglycemic sulfonylureas effects, E491
 Pancreatic enzyme, secretion, calcium-activated, phospholipid-dependent, G692
 Pancreatic islets, sodium-potassium-ATPase activity, hypoglycemic sulfonylureas in, E491
 Pancreatic juice, flow, pH change effects, C235
 Pancreatone, secretion, meal-stimulated, peptide YY effects, G118
 Pantothenate kinase, regulation, E1
 Pantothenic acid, metabolism, E1
 Papaverine, myocardial reactive hyperemia and, brief coronary occlusion, H812
 Papillary muscle: see Muscle, heart
 Parabronchi, paleopulmonic, carbon dioxide in (penguin), R748
 Parasympathectomy, automatic and conductile tissues, heart, H61
 Parathyroidectomy
 gentamicin nephrotoxicity, F332
 phosphate restriction and, uremia, F175
 Parathyroid hormone
 adenosine monophosphate, cyclic, tubular metabolism, F152
 blood pressure, vasoconstrictor agonists and, F674
 calcium flux and, calvariae, F785
 gentamicin nephrotoxicity and, F332
 glomerular filtration determinants and, F482
 interrelations, calcium ions, vitamin D, and inorganic phosphate in acid-base balance, F739
 phosphate excretion, aluminum and, kidney, F64
 sodium-hydrogen exchange inhibition, renal brush border vesicles, F212
 volume expansion proximal inhibitory effect and, F100
 Parathyroid hormone receptor-adenylate cyclase system, benzyl alcohol effects, kidney, E31
 Paraventricular nucleus, neural projections from, vasomotor functions, R271
 Parenteral nutrition: see Feeding
 Pathophysiology, nephroimmunopathology and, F319
 Peanut lectin, cell type differentiation, cortical collecting duct, F449
 Pentagastrin
 histamine and, gastric mucosal, G369
 somatostatin effects and, gastric acid secretion and mucosal blood flow, G337

- Pentobarbital, plasma catecholamines and, E95
- Pentobarbital sodium
nicotine, renal and splanchnic blood flow, H360
sodium and potassium differences, cerebrospinal fluid and plasma, R621
- Pentolinium tartrate, pressor responses, spontaneous hypertension, H49
- Pentose, glucose use, cerebral, C170
- Pepsinogen, secretion, muscarinic stimulation of (frog), G79
- Peptic glands, esophageal, pepsinogen secretion, muscarinic stimulation of (frog), G79
- Peptides: *see also* Polypeptides
brain, body temperature and endotoxin fever (monkey), R674
gastrin-releasing
bombesin antiserum effects, G456
food intake and (baboon), R578
pancreatic exocrine secretion and (pig), G281
residual stimulation, pancreatic acini, G196
vagal regulation of, E425
ion transport, intestinal nerves and, G261
transport, brush-border membrane vesicles, intestinal, G682
two-dimensional mapping, erythrocyte membranes, C70
vasoactive intestinal
colonic carcinoma cell line CaCo-2, epithelial properties, C410
neural mediator of gastric relaxation (guinea pig), G73
preferential binding, hepatic nonparenchymal cells, G663
- Peptide YY, pancreatic and gastric secretion and, meal-stimulated, G118
- Perfluorochemicals, steroid secretion and, testicular, E432
- Perfluorotributylamine, steroid secretion, testicular, E432
- Pericardioperitoneal canal, function, elasmobranch (fish), H198
- Pericardium, function, elasmobranch (fish), H198
- Perineurium, blood flow, sciatic nerve, H311
- Peripheral nerve
blood flow, laser Doppler flowmetry and iodoantipyrine, H311
ischemic conduction failure, diabetic neuropathy, E457
- Peritoneal cavity
cardiovascular response, simulated ascites, R208
plasma, macromolecule exchange, H15
- Peritoneum
macromolecule absorption, quantitative autoradiography, H26
plasma transport, model, F413, F425
- Permeability
amiloride effects, urinary bladder (toad), F56
ammonia transport, bladder (turtle), F720
anion, gastric mucosa (bullfrog), G587
blood-brain barrier, H712
capillary
albumin modulation of, H264
dextran and, hindlimb, H452
intestinal, hypoxia effects, G272
small intestine, G670
effective, diploid fibroblasts, C154
endothelial, arterial macromolecular transport, H945
ions, membrane vesicles, smooth muscle, C372
membrane, calcium transport and, renal cortical mitochondria, F876
nephron, ammonia, F459
potassium
gallbladder epithelium (mudpuppy), C58
iodoacetic acid inhibition, erythrocytes, C419
proximal convoluted tubule, F228
proton/hydroxyl, proximal tubule brush-border vesicles, F78
relative ion, determination of, C399
water
antidiuretic hormone and, pH C183
macula densa, F890
microvillus membrane vesicles, renal, F650
regulation, urinary bladder (toad), F260
urinary bladder (toad), F56
zymogen granule membrane, protein, G385
- pH
acid, uptake and release of cobalamin, intestinal, G326
bicarbonate absorption, proximal tubules, F272
brain, ischemia and (gerbil), R99
calcium flux, calvariae, neonatal, F785
cell, papillary collecting duct, kidney, C241
change, redox state and CCK-induced secretion, pancreas, C235
changes, colloid osmotic pressure and, H890
cytoplasmic, phorbol ester-induced changes, neutrophils, C379
disequilibrium, ammonia transport, kidney, F459
extracellular, nuclear magnetic resonance (frog), C177
gap junction, regulation of conductance, H753
intracellular
anion transport inhibitors, urinary bladder (toad), F594
insulin effects, skeletal muscle fibers and (frog), C330
smooth muscle, phosphorus nuclear magnetic resonance, C320
intracellular transients, tissue, dimethadione distribution measurement (rainbow trout), R668
muscle
phosphorus nuclear magnetic resonance, C279
water and ion shifts, exercise effects, R190
phosphate transport and, renal brush-border membrane vesicles, F705
stimulation effects, rectococcygeus muscle, C357
surface, intestines, G608
value, intestinal villi, jejunum, G293
- Phase response relations, extraretinal photoreception (lizard), R407
- Phenothiazines
sodium and chloride transport and, ileal, G726
suppression, transient depolarizations, ventricular cells, H291
- Phentolamine
blood flow distribution, Cushing response, H98
estrogen-induced vasodilation and, α -receptors (sheep), H339
- Phenylephrine
reflex bradycardia, anterior hypothalamic lesions and, H937
renal sympathetic nerve activity and, elevated pressure effects, H827
smooth muscle relaxation, adenosine-mediated (ferret), H109
- Phenylisopropyladenosine, adenylate cyclase activity and, heart, H737
- 8-Phenyltheophylline, smooth muscle relaxation, adenosine-mediated (ferret), H109
- Phlorizin, glucose transport and, intestinal epithelia (flounder), R573
- Phorbol esters
cell proliferation and differentiation, C3
changes in cytoplasmic pH, neutrophils, C379
electrical activity and, B cells, C527
sodium ion transport and, skin (frog), C457
- Phosphagens, smooth muscle, phosphorus nuclear magnetic resonance, C320
- Phosphate
aluminum effects, renal handling, F64
depletion, blood pressure and vascular reactivity and, F93
excretion, uremia and, parathyroidectomy effects, F175
flux, vitamin D metabolite effects, enterocytes, G40
inorganic
maleic acid-induced renal tubular dysfunction, F513
myocardial ischemia and, H644
nuclear magnetic resonance, leg muscle, C542
parathyroid hormone, calcium ion and vitamin D interrelations, acid-base balance, F739
sodium-dependent uptake, G40
intracellular, nuclear magnetic resonance (frog), C177
loading, renal tubular dysfunction and, F513
nicotinamide adenine dinucleotide, redox state and secretion, pancreas, C228
pathway, cerebral, C170
reabsorption, tubular capacity for, nephron, F729
transport
pH effects, renal brush-border membrane vesicles, F705
phosphate-derived LLC-PK₁ cells, F122
renal brush-border vesicles, F212
- Phosphatidylcholine, glucose carbon incorporation into, ozone exposure and, E553
- Phosphatidylcholine liposomes, guanosine monophosphate, cyclic and, heart cells, H745
- Phosphatidylinositol
cell proliferation and differentiation, C3
interactions, urinary bladder (toad), F454
- Phosphatidylinositol-4,5-bisphosphate, intracellular second messengers, liver, C203
- Phosphaturia, aluminum effects, renal phosphate handling, F64

- Phosphocreatine**
nuclear magnetic resonance
fast- and slow-twitch muscle, C279
leg muscle, C542
perfused single skins, nuclear magnetic resonance (frog), C177
- Phosphodiesterase**, cortical tubule response to, F152
- Phosphoinositide**, cholecystokinin-stimulated, breakdown, calcium in, exocrine pancreas (guinea pig), G551
- Phospholipase**
interactions, urinary bladder (toad), F454
prostaglandin E₂ control, mesangial cells, C119
- Phospholipids**
aldosterone stimulation, sodium transport and (toad), F43
heart contractility, sarcolemma-calcium interactions and, H147
interactions, urinary bladder (toad), F454
oncogenes, ions and, C3
prostaglandin E₂ control, mesangial cells, C119
protein kinase and, pancreatic acinar cells, G692
stretched stomach lining, G643
- Phosphorus**
bone mineral loss, during lactation, E182
metabolism, vitamin D₃ metabolite effects, embryo (chick), E281
nuclear magnetic resonance, chemical changes, leg muscle, C542
transport, diploid fibroblasts, C154
Phosphorylase, lymph, cardiac, H350
Phosphorylase kinase, deficiency, blood glucose homeostasis, liver, E44
Phosphorylation, potential, aerobic rest-work transitions, H922
Photoperiod, pigmentation, prolactin stimulation of (hamster), R664
Photoreception, extraretinal, phase response curve (lizard), R407
Pigmentation, prolactin stimulation of (hamster), R664
Pineal gland, pigmentation, prolactin stimulation of (hamster), R664
Pinocytosis, absorptive, liver, G8
Pirenzepine
muscarinic inhibition, small intestinal motility, G526
muscarinic receptors, gastric somatostatin and gastrin regulation, G184
- Pituitary cells**
anterior
growth hormone and arachidonate release, E438
TRH-induced membrane hyperpolarization, E64
hormone secretion, dihydropyridine inhibition of, C510
reserpine, calcium uptake and, E15
- Pituitary gland**
anterior, dehydration and angiotensin II receptors, E264
glucose infusion effects, lactation (dairy cow), E108
testicular function and, food restriction effects, R181
- Pituitary hormones**, adrenal regeneration and, E471
- Plasma**
basal level, pancreatic polypeptides (monkey, human), R739
catecholamines: see Catecholamines
cerebrospinal fluid and, sodium and potassium differences, R621
chloride: see Chloride
cortisol: see Cortisol
epidermal growth factor in, method, ontogeny, and sex difference effects, E391
epinephrine: see Epinephrine
flow: see Flow
insulin: see Insulin
lipids: see Lipids
membrane: see Membrane
6-mercaptopurine disposition, model (monkey), R147
osmolality: see Osmolality
peritoneal cavity and, macromolecule exchange, H15
peritoneal transport, model, F413, F425
renin: see Renin
vasopressin: see Vasopressin
viscosity, plasma lipid levels and, E10
volume expansion: see Volume expansion
volume: see Volume
- Plasmalemma**, cardiac, freeze-fractured, H297
- Plasmin**, platelet-fibrinogen interactions, irreversible, C466
- Platelet activating factor**, prostaglandin synthesis, mesangial cells, F240
- Platelet-fibrinogen interactions**, irreversible, examination of, C466
- Platelets**
distribution, arterioles, H318
endothelium-dependent relaxations, adenosine nucleotides and serotonin, H389
- Pneumonectomy**, unilateral, lung growth in response to, E162
- Polyamines**, uptake, lung, E292
- Polycythemia**, hematocrit effects, oxygen effects, intestine, neonate (lamb), G432
- Polymeric immunoglobulin**, uptake, hepatic, G450
- Polypeptides**: see also Peptides
gastric inhibitory, insulin release, carbachol effects, pancreatic lobules, E299
pancreatic
basal plasma levels of (monkey, human), R739
divalent cation effects, G28
gastrointestinal alkaline secretion and, G687
meal-stimulated secretion, G118
satiety in obesity, G277
vasoactive intestinal, lipid-induced hyperemia, G208
- Polysomes**, albumin-synthesizing, insulin-treated diabetes, E656
- Portal vein**
hepatic
adenosine effects, H331
pancreatic polypeptides, basal plasma levels (monkey, human), R739
smooth muscle relaxation, adenosine-mediated (ferret), H109
stenosis, vascular sensitivity to norepinephrine, G192
- Posture**, heart rate, autonomic function in, spectral analysis, H151
- Potassium**
acute loading, prostaglandins in renin suppression, F360
depletion, chloride transport and, Henle's loop, F682
dietary depletion, chloride conservation and, renal, F104
efflux, calcium-dependent, iodoacetic acid inhibition of, erythrocytes, C419
electrochemical profile, distal tubule (frog), F266
excretion, potassium adaptation and, kidney, F602
flux, volume regulatory response of lymphocytes, C480
glomerulosa cell responsiveness, prolonged stimulation with angiotensin II, E209
hydrogen secretion, omeprazole inhibition of, jejunum (frog), G256
intake, urinary prostaglandin excretion, F382
intracellular concentration, shifts, exercise effects, R190
isolated cells, liver, kidney, and colon (guinea pig), C271
low, hypoxic pressor reactivity and, lung, H55
movements, denervated sartorius muscle (frog), C217
permeability, gallbladder epithelium (mudpuppy), C58
postrenal modification (bird), R93
recycling, aldosterone effects, kidney, adrenalectomy effects, F219
secretion
colonic, cAMP and calcium in, G103
distal, stimulation by low lumen chloride, barium and, F638
smooth muscle relaxation, adenosine-mediated (ferret), H109
sodium and, differences in cerebrospinal fluid and plasma, R621
transmembrane fluxes, ventricular myocytes, H614, H622
transmembrane potential, papillary epithelial cells, F762
transport
alkaline gland (skate), R346
ammonia effects, cortical collecting tubule, F631
diploid fibroblasts, C154
mineralocorticoid regulation of, cortical collecting duct, F858
passive, proximal convoluted tubule, F228
transport regulation, hydrogen-potassium-ATPase-rich vesicles, G595
- Potassium channels**, ventricular myocytes, H622
- Potassium chloride**, epithelial cell volume regulation, gallbladder (frog), C27
- Potassium ion**
calcium efflux and, aldosterone production, adrenal glomerulosa cells, E36
calcium ion-activated permeability, pancreatic islets, E491
calcium ion-mediated conductance, pituitary cells, E64
conductance, denervated sartorius muscle (frog), C217
homeostasis, ischemia effects, brain (turtle), R531
- Potential difference**
acid secretion, gastric mucosa (frog), G246
transepithelial, distal tubule (frog), F266
- Potential drop**, sudden, gastric mucosa (bullfrog), G587

Potentials

- action
 - antidromic, renobulbar afferent fibers, R113
 - migrating complex, small intestine, G495
- basolateral membrane, dibutyl-*c*-AMP effects, Malpighian tubules, R339
- inhibitory junction, smooth muscle cell membranes, esophagus (opossum), G342
- intracellular, outer medullary collecting duct, F500
- membrane
 - cell, antral mucosa (toad), G574
 - hydrogen transport, papillary collecting duct, kidney, C241
 - relative ion permeabilities, C399
 - resting, denervated sartorius muscle (frog), C217
- slow action
 - apamin effects, heart muscle, H961
 - guanosine monophosphate, cyclic effects, heart cells, H745
 - transmembrane, renal papillary epithelial cells, F762
- Prazosin, stimulation, renin release, E317
- Prealbumin, thyroxine bound to, liver, G545
- Pregnancy: *see also* Fetus; Lactation
 - bone mineral loss, regulation of, E182
 - prolactin surges, conceptus number, hysterectomy, and progesterone effects, E269
 - unstressed, cardiac output distribution (guinea pig), R698
 - uterine and carotid artery changes (sheep), H658
 - vasopressin secretion, osmoregulation and, R29
- Prematurity, refractoriness of extrastimuli and, H606
- Pressor reactivity, hypoxic, sodium-potassium-ATPase and, lung, H55
- Pressure: *see also* Blood pressure
 - arterial
 - bombesin effects, H425
 - bradykinin action, F87
 - natriuresis, prostaglandins in, F8
 - stroke volume effects, H477
 - capillary, filtration rate and, autoregulation, hindquarters, H835
 - colloid osmotic
 - peritubular protein effects, proximal convoluted tubule, F790
 - pH changes and, H890
 - coronary and extravascular, blood velocity and, H170
 - diuresis-natriuresis response, spontaneous hypertension, F199
 - filtration, effective, parathyroid hormone effects, F482
 - hepatic, norepinephrine effects, H468
 - interstitial fluid, pH change effects, H890
 - intra-abdominal hydrostatic, elevation, cardiovascular responses to, R208
 - intracranial, regional blood flow, Cushing response, H98
 - left atrial, inhibition of renin secretion and, R641
 - lower esophageal sphincter
 - fasting, awake-state (opossum), G398
 - sleeve device functions as Starling resistor, G251
 - natriuresis, model, F190
 - oncotic, efferent arteriole, estimating, F444
 - overload, hypertrophied heart, H485
 - perfusion, renal, α - and β -adrenergic stimulation of renin release and, E317
 - renal sympathetic nerve activity and, arterial baroreflex control of, H827
 - stop-flow, tubuloglomerular feedback, nephron obstruction, F688
 - transcapillary Starling, interstitial compliance and, skin and skeletal muscle, H666
 - venous compression, nerves and prostaglandins in, kidney, F810
- Pressure-flow relations, impedance and capacitance, coronary diastolic, H700
- Pressure-volume relations
 - hepatic, norepinephrine effects, H468
 - pericardial, elasmobranch (fish), H198
 - ventricular, reduced resistive afterload effects, H163
- Procainamide, refractoriness and, extrastimuli, H606
- Procaine, intrapericardial, onset of exercise and, H457
- Progesterone
 - gap junctions, myometrium, C296
 - prolactin surges and, E269
 - sodium transport and, colon, G124
- Proglumide, pancreatic exocrine response, cholecystokinin effects, G347
- Prolactin
 - hormone secretion, pituitary cells, C510
 - lipid fluidity and, prostatic membranes, E687
 - ovine, specific binding sites (toad), C80
 - release, pituitary cells, E15, E64
 - stimulation, pelage pigmentation (hamster), R664
 - surges, conceptus number, hysterectomy, and progesterone effects, E269
- Proline, transport, brush-border membrane vesicles, intestinal, G682
- Promethazine, sodium and chloride transport, ileal, G726
- Propionate, bicarbonate and, electrophysiological effects on gallbladder (mudpuppy), C58
- Propranolol
 - adenosine and, ventricular automaticity, H907
 - blood flow distribution, Cushing response, H98
 - blood pressure, norepinephrine spillover and, R400
 - reflex bradycardia, anterior hypothalamic lesions and, H937
 - sarcolemmal sodium-potassium-ATPase, inhibition by palmitoyl carnitine, H75
 - sodium chloride intake and, R1
 - stimulation, renin release, E317
- Propylthiouracil, dosage effects, serum thyroxine, growth and weaning, R524
- Prostacyclin
 - cardiac output and, fetal (lamb), H853
 - coronary and systemic, myocardial ischemia, H493
 - pulmonary hypertension, alveolar inflammation and arachidonate metabolism, H859
 - selective inhibition effects, renal function, F753
- Prostaglandin E₂
 - binding, oviduct (hen), E80
 - cardiac output and, fetal (lamb), H853
 - differential stimulation of, mesangial cells, C119
- excretion
 - renal arterial pressure, F8
 - sustained water diuresis effects, F830
 - release, bradykinin effects, tracheal epithelium, F48
 - responses to AVP and dDAVP, central and nephrogenic diabetes insipidus, F354
 - synthesis, collecting tubules, neonatal and adult, F134
- Prostaglandin I₂, production, α -toxin-induced, endothelial cells, C127
- Prostaglandin inhibitors, loop segment chloride uptake and, furosemide diuresis, F698
- Prostaglandins
 - cardiac output and, fetal (lamb), H853
 - coronary and systemic, myocardial ischemia, H493
 - dopamine actions and, pancreas, G110
 - ethanol effects and, sodium transport, gastric mucosa, G299
 - gap junctions, myometrium, C296
 - gastric mucosal protection, chronic restraint, G35
 - gastric vasoconstrictor actions of, microcirculation, G580
 - growth hormone-releasing factor and, anterior pituitary cells, E438
 - interactions of vasopressin and cAMP, urinary bladder (toad), F454
 - intestinal motility and, G353
 - lung water, pulmonary hemodynamics and, H225
 - natriuresis, renal arterial pressure, F8
 - potassium and chloride transport, Henle's loop, F682
 - release, endotoxin effects, E420
 - renin suppression and, acute potassium loading, F360
- synthesis
 - angiotensin II effects, F254
 - inhibition, urinary bladder (toad), F260
 - vasoconstrictor-evoked, mesangial cells, F240
- trophic effects, growth of gastroduodenal mucosa and pancreas, G170
- Tubuloglomerular feedback: *see* Feedback
- urinary, osmolality and, pregnancy, R29
- urinary excretion, high potassium intake and, F382
- vascular reactivity and, F674
- vasoconstrictor action and, renal arterioles, F779
- venous compression, renal hemodynamics during, F810
- Prostanoids
 - coronary and systemic, myocardial ischemia, H493
 - synthesis, oviduct (hen), E80
- Prostatic membranes, prolactin effects, lipid fluidity, E687
- Protamine sulfate, interaction, liver, G463
- Protease, serine, glandular kallikrein and, E664
- Protein
 - aggregation, receptor, dynamic model, R312

Protein (continued)

- biliary excretion, tauroursodeoxycholate prevention of, G407
 - binding
 - albumin and gamma globulin effects, liver, G702
 - seawater adaptation and, R651
 - calmodulin-acceptor, colonic glycoprotein and, G54
 - composition, cell biology and, cardiac gap junctions, H783
 - concentration, fluid uptake, renal papilla, F347
 - concentration and output, lymph flow and, small intestine, G670
 - contractile, cardiac, function during diabetes, E170
 - degradation
 - redox potential and, heart, E726
 - thyroxine-induced hypertrophy, heart, C309
 - dietary, reduced, renal, F31
 - endocytic uptake, epithelial cells, C12
 - erythrocyte membrane, polypeptide families, C70
 - formation, diabetes and, heart, E602
 - high intake, renal hemodynamics and, F656
 - peritubular, sodium chloride absorption, proximal convoluted tubule, F790
 - permeability to, zymogen granule membrane, G385
 - plasma, thyroxine bound to, liver, G545
 - postnatal hypothyroidism, heart cells, E381
 - restriction, sympathetic nervous system activity and, R627
 - secretion, nicotine stimulation of, pancreatic acini, G158
 - serum, chemical activity, mathematical models, H240
 - turnover
 - muscle, exercise effects, E588
 - muscle, exercise training and renal insufficiency, E337
 - uncoupling, brown adipose tissue mitochondria (hamster), E699
- Protein kinase
- calcium-activated, phospholipid-dependent, pancreatic acinar cells, G692
 - electrical activity and, B cells, C527
- Protein kinase C, intracellular second messengers, liver, C203
- Protein synthesis
- exercise training effects, renal insufficiency and, E337
 - faster, thyroxine-induced hypertrophy, heart, C309
 - hexose transport, inhibition by dexamethasone, adipocytes, E215
 - isolated cells, liver, kidney, and colon (guinea pig), C271
 - malnourishment, during parenteral nutrition, E409
 - nicotine stimulation, pancreatic acini, G158
- Proteolysis, cathepsin D, cardiac, C135
- Puberty, epidermal growth factor measurement, plasma, E391
- Pulmonary artery
- endothelial cells, prostaglandin I₂ production, α -toxin-induced, C127
 - endothelium, norepinephrine uptake and metabolism, H193
- Pulmonary vein, endothelium-dependent contractions, arachidonic acid, cyclooxygenase effects, H432

- Pulsus alternans, spontaneous oscillations, cardiac cells, H412
- Pump
- hydrogen, ATP-dependent, kidney cortex, F835
 - osmotic, inulin infusion with, measurement of glomerular filtration rate, F734
- sodium
- aldosterone-induced sodium ion transport (toad), C102
 - calcium electrogenic, tail artery, H419
 - density of cells, tracheal mucosa, C389
 - vascular smooth muscle cells, C436
 - sodium-potassium, ventricular myocytes, H614
- Purine, metabolism, skin fibroblasts, C21
- Purkinje fibers
- cardiac, glycogen metabolism in, H599
 - plasma membrane, freeze-fractured, H297
- Pyloric cuff, gastric sham feeding, R387
- Pylorus, opiates, intraduodenal amino acid reflexes, G307
- Pyrazinoic acid, transport, renal membrane vesicles, F574
- Pyruvate, ¹⁴C-labeled, gluconeogenesis with, R391
- Pyruvate carboxylase, gluconeogenesis with, R391
- Pyruvate dehydrogenase, gluconeogenesis with, R391

Q

- Quinidine, apamin binding and, heart muscle, H961
- Quinine, sodium-potassium-ATPase activity and, pancreatic islets, E491

R

- Radiation, gamma, inactivation, antrum smooth muscle plasma membrane, C449
- Radioimmunoassay
- adrenal corticoids, circadian timing and (hamster), R434
 - arginine vasotocin and glomerular filtration rate, salt acclimation and (duck), F663
 - fever-specific changes, central melanocyte-stimulating hormone and corticotropin-releasing factor, R125
 - pancreatic and gastric secretion, meal-stimulated, G118
 - somatostatin release, sham feeding, bethanechol, and bombesin effects, G1
 - sustained water diuresis effects, prostaglandin E₂ excretion, F830
- Radioisotopes, glucose and free fatty acid kinetics, sepsis, E236
- Ranatensin, residual stimulation of amylase release, pancreatic acini, G196
- Receptors
- α -, estrogen-induced vasodilation and (sheep), H339
 - adenosine, pacing-induced coronary functional hyperemia and, H1
 - adrenergic, catecholamine effects, skeletal muscle, C406
 - adrenoreceptors, fatty acid reesterification, adipose tissue, E140
 - α -adrenoreceptors, renal, sodium excretion and, F128
 - β -adrenoreceptors, brown adipose tissue, E397

- aldosterone, sodium ion transport and, bladder (toad), C102
 - α and β , phosphate depletion effects, F93
 - angiotensin, kidney tubules, F621
 - angiotensin II, dehydration and, anterior pituitary, E264
 - antidiuretic hormone, number regulation, C425
- baroreceptors
- aortic, acute resetting, vessel wall and, H843
 - cardiopulmonary, osmotically stimulated vasopressin, R660
 - carotid sinus, control during skeletal muscle contraction, H688
 - carotid sinus, heart rate and, H631
 - renal, left atrial pressure and renin secretion, R641
 - sino-aortic denervation, vasopressin effects, awake state, H652
 - stimulation, liver perfusion and, H186
- cardiac sensory, intracoronary acetylcholine and, awake state, H930
- cholecystikinin, pancreatic acini (guinea pig), G98
- cholecystikinin antagonist activity, carbobenzoxy amino acids (guinea pig), G479
- gonadotropin-releasing hormone function, dynamic model, R312
- monosodium glutamate effects, pituitary, E126
- hormone, benzyl alcohol effects, kidney, E31
- insulin, cerebral microvessels, E115
- kidney, vitamin D₂ binding, autoradiography, F296
- left atrial, heart rate and, H631
- mechanoreceptors
- cardiopulmonary, renal nerve activity, awake state, F15
 - renal (monkey), R202
 - renobulbar afferent fibers, R113
- mineralocorticoid
- aldosterone uptake, bladder (toad), C88
 - circulating mononuclear leukocytes, E388
- mu₂carinic, pirenzepine-sensitive, regulation of gastric hormones, G184
- oncogenes, ions, and phospholipids, C3
- polymeric immunoglobulin, biliary excretion, G450
- presynaptic, acetylcholine release, heart atria, H33
- prolactin, binding sites in cell lines (toad), C80
- prostaglandin, oviduct (hen), E80
- prostatic prolactin, lipid fluidity and, E687
- serotonin binding, lung, E58
- volume, cold temperature and water immersion effects, R560
- Rectal gland, stimulation, volume expansion and (dogfish), R638
- Rectococcygeus muscle, pH and energetics, stimulation effects, C357
- Red blood cells: see Erythrocytes
- Redox state
- pH change effects, pancreas, C235
 - protein degradation and, heart, E726
 - secretion and, pancreas, C228
- Reflexes
- amino acids, pyloric opiate-mediated, G307

- baroreflex
 - anterior hypothalamic lesions and, H937
 - arterial, renal sympathetic nerve activity and, H827
 - arterial and cardiac, onset of exercise and, H457
 - C₁ neurons and, H547
 - cardiovascular, intracoronary acetylcholine, awake state, H930
 - carotid sinus, left atrial interaction, heart rate and, H631
 - chemoreflexes, peripheral, during hypoxia (sheep), H118
 - Henry-Gauer, cold temperatures and water immersion, R560
 - ipsilateral renorenal, venous compression, nerves and prostaglandins in, F810
 - local, neurons, stellate ganglion, R288
 - muscle-heart, short-latency tachycardia and, R426
 - osmotically stimulated vasopressin and, R660
 - pressor responses, vasopressin in spontaneous hypertension, H49
 - renal, mechanoreceptors and (monkey), R202
 - stimuli and responses, intestinal nerves and ion transport, G261
 - sympathetic, liver perfusion, H186
 - vesicosympathetic, sympathetic nerves, R236
 - Refractoriness, autonomic modulation of, His-Purkinje system, R515
 - Refractory period, effective, infarction, procainamide, coupling interval, and cycle length effects, H606
 - Rehydration, plasma vasopressin levels and (sheep), R68
 - Renal nerve

 - propranolol infusion and, R400
 - Sympathetic responses, urinary bladder distension, R236
 - Sympathetic stimulation, peripheral, liver perfusion and, H186
 - Sympathoadrenal activity, brown fat and, hypothalamic obesity effects, E607
 - Sympathoadrenal response, neonatal adaptation (sheep), E443
 - System identification, ferrokinetics, R378
- ## T
- Tachycardia
 - functional hyperemia, aminophylline effects, H1
 - short-latency, stimulation of muscle and cutaneous afferents, R-26
 - Taenia coli, phosphagens and intracellular pH, phosphorus nuclear magnetic resonance, C320
 - Tail artery, norepinephrine-induced phasic activity, genetic hypertension and, H419
 - Taste: see Feeding; Gustatory response
 - Taurocholate
 - biliary protein excretion and, G407
 - chylomicrons, vitamin D_3 absorption and, intestinal, G718
 - transport, basolateral plasma membrane, developing liver, G648
 - Tauroursodeoxycholate, biliary protein excretion and, G407
 - Temperature
 - activity rhythms and, forced internal desynchronization (monkey), R567
 - air, central control of (reindeer), R679
 - cold, water immersion, urinary responses to, R560

- Temperature (*continued*)
 pentobarbital effects, plasma catecholamines, E95
 physiological stability and, skeletal muscle, C265
 regulation
 deoxyglucose incorporation and, R84
 food restriction and, obesity, E531
 Temperature, body
 cycle, circadian sleep-wake cycle and (monkey), R353
 endotoxin fever and, intracerebroventricular vasopressin effects (monkey), R674
 glucose kinetics and, lethal and nonlethal doses of endotoxin and, R471
 hypothalamic, central control of (reindeer), R679
 regulation, hypoxia effects (lizard), R595
 scrotal, dopaminergic drugs and, R108
 vasopressin release, endotoxin effects, E420
 Testicles
 pituitary function and, food restriction effects, R181
 reproductive tract fluids, androgens in, male, E274
 steroid secretion, perfluorochemicals as oxygen carriers, E432
 Testosterone
 epidermal growth factor measurement, plasma, E391
 pituitary-testicular function, food restriction effects, R181
 reproductive tract fluids, male, E274
 secretion, perfluorochemicals as oxygen carriers, testes, E432
 sodium transport and, colon, G124
 12-O-Tetradecanoyl-phorbol-13-acetate cytoplasmic pH, neutrophils, C379
 electrical activity and, B cells, C527
 Tetraphenylphosphonium ion, flux and potential, determination of, C399
 Tetrodotoxin, nerve blockade, insulin oscillations and, pancreas, E516
 Thallium(I), S49 lymphoma cells, C51
 Theophylline, adenosine and, ventricular automaticity, H907
 Thermoequilibrium, urinary responses, R560
 Thermogenesis
 brown adipose tissue, ventromedial hypothalamic lesions, E20
 brown fat, food restriction effects, E531
 cAMP metabolism and lipolysis, brown adipocytes (hamster), E224
 ephedrine-induced, brown fat and skeletal muscle contributions, E507
 fat deposition, brown adipose tissue lipectomy and, R231
 food, ingested versus tube-delivered meals, E370
 hypothalamic obesity, brown fat, E607
 insulin effects, exercise, skeletal muscle, E148
 meal-induced, palatability in, E333
 nonshivering
 cafeteria feeding and brown fat (hamster), E230
 guanosine binding and thermogenin, brown fat, C365
 postprandial, palatability and, E75
 Thermogenin, brown fat, cold exposure and, C365
 Thermoregulation
 central angiotensin II and, brain (sheep), R371
 expired air temperature and, central control (reindeer), R679
 hypothalamic or peripheral, deoxyglucose incorporation during, R84
 intracerebroventricular vasopressin effects (monkey), R674
 renobulbar, properties of, R113
 striatal neuronal responses, dopaminergic drugs, R108
 Thermosensitivity, dopamine and, striatal, R108
 Thiocyanate, secretion, electroneutral, gastric mucosa (frog), G246
 Thirst: *see* Drinking
 Thromboxane
 gastric vasoconstrictor actions of, microcirculation, G580
 pulmonary hypertension, alveolar inflammation and arachidonate metabolism, H859
 selective inhibition effects, renal function, F753
 Thromboxane B₂, coronary and systemic, myocardial ischemia, H493
 Thyroid hormone
 insulin action and, E593
 level, pressure-overloaded heart, weanling and adult, H305
 postnatal hypothyroidism, heart cells, E381
 Thyroid hormone-binding globulin, prealbumin, liver, G545
 Thyroparathyroidectomy
 glomerular filtration and, F482
 proximal absorption, volume expansion-induced inhibitory, F100
 Thyrotoxicosis, insulin action, thyroid hormone effects, E593
 Thyrotropin-releasing hormone, membrane polarization, anterior pituitary cells, E64
 Thyroxine
 hypertrophy, heart, faster protein and ribosome synthesis in, C309
 protective effect of, gentamicin nephrotoxicity, F332
 serum, propylthiouracil dosage effects, R524
 transport, prealbumin, liver, G545
 Tissue: *see also* Chromaffin tissue; Connective tissue
 concentration gradients, macromolecule absorption, peritoneal, H26
 insulin sensitivity, dose-response relations, E353
 intracellular pH transients in, dimethadione distribution measurement (rainbow trout), R668
 metabolism, allometric study, R415
 microcirculatory studies, cheek pouch (hamster), H143
 Tolbutamide, sodium-potassium-ATPase activity and, pancreatic islets, E491
 Trace elements, kinetics, intestines, G46
 Tracer kinetics
 radioactive, transmembrane potassium fluxes, myocytes, H614
 sodium, epithelial, F308
 Trachea, epithelium, bradykinin effects, F48
 Tracheal mucosa, cell density, sodium pump, C389
 Transaminases, biochemical characterization, renal epithelial cells, F536
 Transferrin, iron release and, hepatocytes, G93
 Transmethylations, aldosterone-stimulated, sodium transport and (toad), F43
 Triacylglycerol, metabolism, cardiac myocytes, H208
 Tricarboxylic acid, cycle, citrate specific activity ratios, E252
 Tricyclic antidepressants, acid secretory response and, gastric cells, G360
 Trifluoperazine
 calcium ions, serum-stimulated sodium ion influx and, normal and transformed cells, C288
 potassium and chloride secretion, colonic, G103
 transient depolarization, ventricular cells, H291
 Triglycerides
 intestinal, endogenous and exogenous sources, G164
 plasma viscosity and, E10
 Trypsinogen, secretion, nicotine stimulation of, pancreatic acini, G158
 Tumor promoters, sodium ion transport and, skin (frog), C457

U

- Ulcer, stress, sudden potential drop, gastric mucosa (bullfrog), G587
 Ultrafiltration
 glomerular
 dynamics, F163
 nephroimmunopathology, F319
 Ultrafiltration coefficient, parathyroid hormone effects, F482
 Ultrastructure, larval salt gland (shrimp), R709
 Uninephrectomy, glomerular filtration rate, measurement with inulin, F734
 Urate, carrier-mediated concentrative transport, renal membrane vesicles, F574
 Urea
 permeabilities, urinary bladder (toad), F56
 transmembrane potential and, papillary epithelial cells, F762
 transport, water and, microvillus membrane vesicles, F650
 Ureagenesis, carbamoyl-phosphate synthetase I activity, regenerating liver, G501
 Uremia
 chronic, exercise training effects, muscle protein turnover, E337
 phosphate excretion in, parathyroidectomy and, F175
 Ureter
 obstruction, tubuloglomerular feedback after, F688
 on and off response (guinea pig), C165
 Uric acid, postrenal modification (bird), R93
 Uridine, incorporation, collecting tubules, F552
 Urinary bladder
 aldosterone uptake, mathematical model (toad), C88
 ammonia transport, hydrogen secretion and (turtle), F720

SUBJECT INDEX TO VOLUME 248

- distension, sympathetic responses to, R236
 - hydrogen ion secretion, inhibition by lectins (turtle), R584
 - interactions, vasopressin, cAMP, and prostaglandins (toad), F454
 - ovine prolactin binding sites (toad), C80
 - phosphagens and intracellular pH, phosphorus nuclear magnetic resonance, C320
 - sodium ion transport
 - aldosterone-induced (toad), C102
 - crystals and, F70
 - sodium transport, aldosterone-stimulated transmethyations (toad), F43
 - urea and sodium permeabilities (toad), F56
 - water and sodium transport, anion transport inhibitors (toad), F594
 - water permeability, regulation of (toad), F260
 - Urinary concentration, transmembrane potential and, papillary epithelial cells, F762
 - Urinary stones, sodium ion transport and, urinary bladder, F70
 - Urine
 - concentration and dilution
 - pressure natriuresis, model, F190
 - spontaneous hypertension, F199
 - flow
 - calcium excretion (teleost), R18
 - drop-counting computer, H286
 - osmolality, angiotensin II effects, F254
 - postrenal modification (bird), R93
 - Urophysiology, activation of hypothalamo-hypophysial-interrenal system (goldfish), R197
 - Urophysis, hypothalamo-hypophysial-interrenal system activation (goldfish), R197
 - Urotensin I, hypothalamo-hypophysial-interrenal system activation (goldfish), R197
 - Ursodeoxycholate, biliary bicarbonate secretion, acid-base balance and acetazolamide effects, G20
 - Uterine artery, pregnancy-induced changes (sheep), H658
 - Uterus
 - hormonal control, gap junctions in myometrium, C296
 - prostaglandin E₂ binding (hen), E80
- V
- Vagal afferents, intracoronary acetylcholine effects, awake state, H930
 - Vagina, prostaglandin E₂ binding (hen), E80
 - Vagotomy
 - atropine, exocrine pancreatic secretion and, G532
 - gastric mucosal protection, chronic restraint, G35
 - gastrointestinal motility and, G15
 - Vagus nerve
 - abdominal, regulation of ingestive behavior and body weight (hamster), R686
 - activity
 - meal-induced thermogenesis, palatibility in, E333
 - short-latency tachycardia and, R426
 - efferent innervation, heart ventricle, H89
 - gastric hormone release and, E425
 - hydrogen and bicarbonate secretion, gastric, sham feeding and, G188
 - somatostatin effects, sham feeding, bethanechol, and bombesin effects, G1
 - stimulation
 - C₁ epinephrine neurons, brain stem area, H547
 - exocrine secretion and, pancreas (pig), G281
 - Vanadate, acid formation, permeable gastric glands, G561
 - Vasa recta, renal papilla, fluid uptake, F347
 - Vasa vasorum, arteries, diffusional support, H901
 - Vascular perfusion, oviduct, E624
 - Vascular reactivity, parathyroid hormone effects, F674
 - Vascular waterfall, cardiovascular responses, simulated ascites, R208
 - Vasoconstriction
 - hormonal norepinephrine, cerebral and hindlimb vessels, H232
 - hypoxic, sodium-potassium-ATPase and, lung, H55
 - Vasoconstrictor agonists, blood pressure and, parathyroid hormone effects, F674
 - Vasoconstrictors
 - coronary, cultured endothelial cells, C550
 - prostaglandin effects, renal arterioles, F779
 - prostaglandin synthesis, mesangial cells, F240
 - transport responses and, kidney tubules, F621
 - Vasodilation, estrogen-induced, α -receptors in (sheep), H339
 - Vasodilators
 - coronary reserve, functionally significant flow reduction and, H403
 - renal-specific, atriopeptins, awake state, H587
 - therapy, resistive load and ventricular mechanics, H163
 - Vasomotor functions, cardiovascular projections, hypothalamus, R271
 - Vasopressin: *see also* Antidiuretic hormone
 - arginine, mesangial cells, F240
 - coronary circulation and, ischemia, H516
 - glycogen phosphorylase, hepatocytes, newborn, E560
 - hypertension, pressor responses to, H49
 - interactions of cAMP and prostaglandins, urinary bladder (toad), F454
 - intracellular second messengers, liver, C203
 - intracerebroventricular, body temperature and endotoxin fever and (monkey), R674
 - osmotically stimulated, reflex control of, R660
 - plasma
 - angiotensin administration and, awake state, R249
 - cerebrospinal fluid and, dehydration, postural changes, and nausea, R78
 - cerebrospinal fluid regulation and, E346
 - rehydration and (sheep), R68
 - response in heart failure, H396
 - release
 - endotoxin effects, E420
 - osmotic thirst and, R645
 - potentiation of, angiotensin and, awake state, R249
 - secretion, osmoregulation and, pregnancy, R29
 - sodium excretion changes and, α_2 -adrenoceptor antagonism of, F767
 - sodium ion transport and, skin (frog), C457
 - sympathetic nervous system and, hypertonic sodium chloride infusion, awake state, H652
 - water and sodium transport, urinary bladder (toad), F594
 - Vasopressin-neurophysin, conscious and anesthetized, E155
 - Vasospasm
 - cerebral, hormonal norepinephrine, H232
 - platelet, adenine nucleotides and, H389
 - Vasotocin, arginine, glomerular filtration rate and, salt acclimation (duck), F663
 - Velocimeter, pulsed Doppler, flow restriction and arterial diameter growth, H540
 - Venoconstriction, hepatic, norepinephrine effects, H468
 - Venous compression, renal hemodynamics during, nerves and prostaglandins in, F810
 - Venous return, pericardium, elasmobranch (fish), H198
 - Ventilation, controlled, nicotine, renal and splanchnic blood flow and, H360
 - Ventrolateral medulla
 - neural projections from, vasomotor functions, R271
 - rostral, baroreflex vasodepressor responses and, H547
 - Ventromedial hypothalamic syndrome, intragastric hyperalimination and, R172
 - Verapamil
 - adenosine transport and, erythrocytes, H593
 - aldosterone secretion and, sodium depletion (sheep), E676
 - glomerular responses to, spontaneous hypertension and, F668
 - hormone secretion, dihydropyridine inhibition of, pituitary cells, C510
 - vitamin D₃ and, calcium transport, cecum, G676
 - Vesicles, hydrogen-potassium-ATPase-rich, hydrogen chloride secretion and parietal cell physiology, G595
 - Video microscopy: *see* Microscopy
 - Viscosity, cellular, cell geometry and deformability and, C473
 - Vital capacity, cold temperature, water immersion and, R560
 - Vitamin D
 - bone mineral loss, during lactation, E182
 - calcium absorption and secretion, small intestine and colon, G147
 - calcium channel blockers and, calcium transport, cecum, G676
 - interrelations, parathyroid hormone, calcium ions, and inorganic phosphate in acid-base balance, F739

Vitamin D (*continued*)
metabolites, phosphate fluxes and, enterocytes, G40

Vitamin D₃
1,25-dihydroxy-
binding, nephron, F296
calcium channel blockers and, calcium transport, cecum, G676
calcium flux and, calvariae, F785
intestinal absorption, G718
phosphate flux and, enterocytes, G40
intestinal metabolism, portal venous transport and, G633
metabolites, calcium and phosphorus metabolism and, embryo (chick), E281

Voltage, membrane, insulin effects, skeletal muscle fibers (frog), C330

Volume
blood
hepatic, norepinephrine effects, H468
plasma corticosterone and, preoptic recess lesions, R161
cell
diploid fibroblasts, C154
regulation, calcium and cytoskeleton involvement, gallbladder (frog), C27
fluid, interstitial, skin and skeletal muscle, H666
gastric, milk, pup, R732
plasma, endotoxin effects, E420
red cells, splenic (pig), R293
stroke, arterial input impedance and, H477
unstressed, liver, norepinephrine effects, H468

Volume depletion, preoptic recess lesions, plasma corticosterone and volume after, R161

Volume expansion
extracellular, Ringer fluid effects, kidney, F851
peritubular protein effects, proximal convoluted tubule, F790
plasma
edema formation and, Heymann nephritis, F247
inhibition of renin release, F206
proximal inhibitory effects, parathyroid hormone and, F100
rectal gland stimulation and (dogfish), R638
renal nerve activity, awake state, F15
Volume regulation
cation and anion transport pathways, lymphocytes, C480
renal nerve activity, awake state, F15

W

Water
absorption, small intestine, G670
deprivation, angiotensin II receptors and, anterior pituitary, E264
excretion
angiotensin II effects, F254
vasopressin-induced, α_2 -adrenoceptor antagonism of, F767
free clearance, cold temperature and immersion effects, R560
metabolism, brain lesions and, F711
permeability: *see* Permeability
water
reabsorption, early proximal tubule, F113
shifts, skeletal muscle, exercise and, R190
transport

anion transport inhibitors, urinary bladder (toad), F594
urea and, microvillus membrane vesicles, F650
unstirred layers
ammonia transport and, bladder (turtle), F720
intestinal villi, jejunum, G293
uptake, exercise training-induced hypervolemia (greyhound), R422
urine postrenal modification (bird), R93
Weaning, propylthiouracil dosage effects, R524
Weanling, isomyosin and thyroid hormone levels, pressure-overloaded heart, H305
Weight, body, ingestive behavior and, abdominal vagus regulation of (hamster), R686
Wheat germ agglutinin, hydrogen ion secretion and, bladder (turtle), R584
Wheel-running activity: *see* Exercise
White blood cells: *see* Leukocytes

X

Xanthine oxidase
cerebral arteriolar oxygen consumption, arachidonate and, H534
cerebral arterioles, H157
Xenon, clearance, ephedrine-induced thermogenesis, E507

Z

Zinc
absorption, intestine, G46
gastrointestinal hormone release and, G28
Zymogen granule membrane, permeability to protein, G385
